```
<h3>5.2 (4th March 2013)</h3>
<ul>
 <li>Major overhaul of the debugger integration to provide a more consistent debugging ex
erience when using JRebel</li>
 <li>Added CLI activation by invoking bin/activate.cmd|sh &lt;license_file|activation_token|lic
nse_server_url&gt;</li>
 <li>Added support for Apache Camel 2.10</li>
 <li>Added support for EclipseLink 2.4.1</li>
 <li>Added support for TomEE 1.5</li>
 <li>Added support for Thymeleaf 2</li>
 <li>Added support for Log4j 2</li>
 <li>Added support for changing EJB2 method interfaces on WebSphere 6.1</li>
 <li>Added support for Guice Servlet 2/3</li>
 <li>Improved Spring integration, the reloading is done more granularly now for java-based
onfiguration</li>
 <li>Improved Spring Security 3 support</li>
 <li>Improved JRebel licensing check, should be done asynchronously and not block JVM star
up</li>
 <li>Improved Seam3 integration, where it did not activate in some cases</li>
 <li>Improved JSF integration in portal environments (Liferay)</li>
 <li>Fixed issue with EJB interceptors causing an exception on JBoss EAP 5.1.2</li>
 <li>Fixed an issue with Mojarra where and UnsupportOperationException was thrown during
reload</li>
 <li>Fixed an issue with WebLogic where the EJB stubs were not reloaded in the remote client
when the remote interface classes changed</li>
 <li>Fixed an issue with Jersey that caused the ClassLoader to leak in some cases</li>
 </ul>
```
