GAE Java 1.7.7 发布

```html
<ul>
 <li>The Sockets API, which allows applications to make outgoing TCP connections and send/
eceive UDP packets to the Internet using both IPv4 and IPv6, is now available as an experimen
al feature. </li>
 <li>The Java runtime now defaults to Java7. If you still need to use the Java6 runtime, please
use the --use_java6 flag when deploying your app. We encourage you to move to Java7 as so
n as possible.</li>
 <li>Billing enabled apps will no longer be subject to a $2.10 minimum weekly spend. Instead,
apps will only be charged for their actual usage.</li>
 <li>Fixed an issue where Datastore auto ids assigned by the scattered id policy were too larg
 to be represented as floating point numbers in the SDK.</li>
 <li>Fixed an issue with sort by doc_id not translating correctly causing InvalidRequest errors
n the Search API</li>
 <ul>
  <li><a href="https://code.google.com/p/googleappengine/issues/detail?id=8958">https://
ode.google.com/p/googleappengine/issues/detail?id=8958</a></li>
 </ul>
</ul>
<ol>
 <li>终于支持 Sockets API 了，不过目前还是实验特性</li>
 <li>默认运行环境升级到了 Java7</li>
</ol>
<p> </p>
```
