<h3>5.5.1 (26th February 2014)</h3>

<p> </p>

<ul class=" bullets" >

Added support for Tomcat 8.0.1

Added support for Mojarra 2.2

Added support for Jasypt

Improved stability for Wildfly

Improved performance for WAS (smarter resource caching)

Improved performance for PrettyFaces integration

Improved Mojarra plugin to better handle relative paths

Improved Mojarra plugin to not fail when method argument names were not available in library

Fixed an issue that caused

Fixed an issue that caused excessive reloading of xml beans in Spring 2.0

Fixed an issue where a no such constructor: org.apache.jasper.xmlparser.ParserUtils was thrown on Tomcat 7.0.50

Fixed an issue where unauthorized users could synchronize to remote application

Fixed an issue where CXF service endpoints failed after a reload when configured with spring <code><jaxrs:server id=" restContainer" address=" /" ><jaxrs:serviceFactories></code>

Fixed an issue where Apache CODI ViewAccessScoped beans scope was incorrect when run with JRebel
