<p><span style="font-size: x-small;">终于在gae上把b3log搞好了 </span></p>  
<p><span style="font-size: x-small;">原来是下面两个host的位置多了/, 注意正确的配置是应该有/的!!! 请大家注意! </span></p>  
<p><span style="font-size: x-small;">#### Server ####</span><br /><span style="font-size: x-small;"># Configures the followings before deploy</span><br /><span style="font-size: x-small;">serverScheme=http</span><br /><span style="font-size: x-small;">serverHost=budha.b3log.org<span style="text-decoration: line-through; color: #ff0000;">/</span></span><br /><span style="font-size: x-small;">serverPort=80</span><br /><span style="font-size: x-small;">staticServerScheme=http</span><br /><span style="font-size: x-small;">staticServerHost=</span><span style="font-size: x-small;">budha.b3log.org</span><span style="font-size: x-small;"><span style="text-decoration: line-through;"><span style="color: #ff0000; text-decoration: line-through;">/</span></span></span><br /><span style="font-size: x-small;">staticServerPort=80</span><br /><span style="font-size: x-small;"># Note: The context path and static path should be "" if deploy app on ROOT. For other cases, starts with '/'</span><br /><span style="font-size: x-small;"># and not ends with '/', for example, /blog </span><br /><span style="font-size: x-small;">contextPath=</span><br /><span style="font-size: x-small;">staticPath=</span></p>
