<p><span><span>Win7</span><span>的</span><span>80</span><span>端口默认是被</span><span>System</span><span>进程占用的。</span></span></p>  
<p><span><span>用如下方法可以解决</span><span>System</span><span>进程占用</span><span>80</span><span>端口的问题：</span></span></p>  
<p><span><span>打开</span><span>RegEdit:</span><span>开始</span><span>-</span><span>运行</span><span>-</span><span>输入</span><span>regedit-</span><span>调出注册表</span></span></p>  
<p><span><span>找到</span><span>HKEY\_LOCAL\_MACHINE\SYSTEM\CurrentControlSet\services\HTTP</span></span></p>  
<p><span><span>找到一个</span><span>DWORD</span><span>值</span><span>Star</span><span>，将其改为</span><span>0</span></span></p>  
<p><span><span>重启电脑，</span><span>System</span><span>进程将不会占用</span><span>80</span><span>端口</span></span></p>  
<p><span><span>&nbsp;</span></span></p>
