```

<pre><code class="highlight-chroma"><span class="highlight-line"><span class="highlight-cl"> &lt;build&gt;
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;resource
&gt;
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;resour
e&gt;
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;direc
ory&gt;src/main/filters/&lt;/directory&gt;
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;incl
des&gt;
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;in
lude&gt;${env}-aaa-fold/*&lt;/include&gt;
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;/incl
des&gt;
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;targ
tPath&gt;aaa-fold&lt;/targetPath&gt;
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;/resour
e&gt;
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;/resource
&gt;
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;/build&gt;
</span></span></code></pre>

```

我想根据 env 变量，来控制使用 `{env}-aaa-fold` 下的文件，文件copy到目标文件夹aaa-fold下，但是会把 `{env}-aaa-fold` 文件夹路径一并带上 copy 到 aa-fold 文件夹下面，怎么办？

我只想 copy “ `{env}-aaa-fold` ” 下的文件到 “aaa-fold” 。

// -----结贴-----
-----</p>

1、使用： [https://maven.apache.org/plugins/maven-resources-plugin/examples/copy-resources.html](https://ld246.com/forward?goto=https%3A%2F%2Fmaven.apache.org%2Fplugins%2Fmaven-resources-plugin%2Fexamples%2Fcopy-resources.html) ，先把资源文件目录 (`{env}-aaa-fold`) copy 到 target 目录下。

2、修改原来配置

```

<pre><code class="highlight-chroma"><span class="highlight-line"><span class="highlight-cl"> &lt;build&gt;
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;resources
&gt;
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;resource
&gt;
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;directo
ry&gt;target/&lt;/directory&gt;
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;include
&gt;
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;incl
de&gt;aaa-fold/*&lt;/include&gt;
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;/includ
s&gt;
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;/resourc
&gt;
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;/resource
&gt;
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;/build&gt;
</span></span></code></pre>

```

```
</span></span></code></pre>  
<p>谢谢 D 了</p>
```
