```

public class PropertiesUtils {
    private static Logger logger = LoggerFactory.getLogger(PropertiesUtils.class);

    public static final Properties PRODUCER_PROP = PropertiesUtils.getProducerProps();
    //软件安装目录
    private static final String USER_DIR = System.getProperty("user.dir");
    //配置文件目录
    private static final String CONF_PATH = USER_DIR + File.separator + "conf" + File.separator

    /**
     * 获取proterties
     * * @param fileName 配置文件名称
     * @return proterties
     */
    private static Properties getProperties(String fileName) {
        InputStream in = null;

        try {
            in = new BufferedInputStream(new FileInputStream(CONF_PATH + fileName));
        } catch (FileNotFoundException e) {
            logger.error(e.getMessage(), e);
        }

        Properties properties = new Properties();
        try {
            logger.trace("start loading file {} ",fileName);
            properties.load(in);
            logger.trace("load file {} success",fileName);
        } catch (IOException e) {
            logger.error(e.getMessage(), e);
        }
        return properties;
    }

    /**
     * 获取producer 的配置
     *
     * @return Properties
     */
    private static Properties getProducerProps() {
        return getProperties("producer.proterties");
    }

    public static void main(String[] args) {
        System.out.println(USER_DIR);
        System.out.println(CONF_PATH);
        System.out.println(LIKEV_KAFKA_PROP);
    }
}

```

以上代码有问题么？
