Maven 的标准目录结构如下:

目录	说明
src/main/java	Application/Library sources
src/main/resources	Application/Library resources
src/main/resources-filtered	Application/Library resources which are filtered. (Starting with Maven 3.4.0, not yet released.)
src/main/filters	Resource filter files
src/main/webapp	Web application sources
src/test/java	Test sources
src/test/resources	Test resources
src/test/resources-filtered	Test resources which are filtered by default. (Starting with Maven 3.4.0, not yet released.)
src/test/filters	Test resource filter files
src/it	Integration Tests (primarily for plugins)
src/assembly	Assembly descriptors
src/site	Site
LICENSE.txt	Project's license
NOTICE.txt	Notices and attributions required
README.txt	Project's readme

细节请参考 <https://maven.apache.org/guides/introduction/introduction-to-the-standard-directory-layout.html>

除了官方标准的目录外, 如果我们有一些其他文件要放, 应该放到什么目录下面呢? 比如 SQL、Shell 脚本?

对于这个问题, Maven 并没有制定标准, 我们自己可以按照如下约定放置:

目录	说明
src/scripts	启动脚本
src/main/scripts	程序中调用的脚本
src/main/db	数据库相关脚本, 比如建表 SQL
