链滴

Ubuntu14.04 下安装 Nginx 服务器

<p>Nginx选择1.9以上版本，支持tcp包转发。</p>
<p>1、选定安装目录，例如/home/deploy/
2、安装PCRE库：</spn>
tar -zxvf pcre-8.34.tar.gz
cd pcre-8.34
<spa>./configure
make
make install
<spa>(如果默认没有C编译器，使用
apt-get install build-essential安装)</span
3、安装zlib库
tar -zxvf zlib-1.2.5.tar.gz
d zlib-1.2.5
./configure
make
ake install
4、安装nginx
tar -zxvf nginx-1.10.0.tar.g
cd nginx-1.10.0</p>
<p>--以下配置项根据实际情况修改
./configure --prefix=/home/dploy/software/nginx-1.10.0 --conf-path=/home/deploy/software/nginx-1.10.0/conf/nginx.con --pid-path=/usr/local/nginx/nginx.pid --user=deploy --group=deploy --with-http_realip_moule --with-http_sub_module --with-http_flv_module --with-http_dav_module --with-http_gzipstatic_module --with-http_stub_status_module --with-http_addition_module --with-pcre=/hme/deploy/software/pcre-8.34 --with-zlib=/home/deploy/software/zlib-1.2.5 --with-stream</p>
<p>make
make install
5、启动nginx</spa>
/home/deploy/software/nginx-1.10.0/sbin/nginx
6、关闭ginx
pkill -9 nginx
7、重新载入nginx，不需要重启使置生效
/sbin/nginx -s reload</p>
<p> </p>
