Description	Resource
<div> <div>Errors (1 item)</div> <div> <div>Plugin execution not covered by lifecycle configuration: com.mycila.maven-license-plugin:maven-license-plugin:1.9.0:format (execution: default, phase: compile)</div> </div> </div>	pom.xml
<div> <div>Warnings (100 of 350 items)</div> </div>	

如果你是报上面这个错，可以继续往下看。。。

因为 @88250 是用 NetBeans 开发而来，我虽然没有用过NetBeans，猜测两者之间会有些不兼容，且Latke工程各个都依赖parent，一报错都报错，看起来确实不太美观。

只需要在pom.xml文件的 `<plugins>` 外面套一层 `<pluginManagement>` 外衣即可。只要有 `<plugins>` 都加一下。xiaoV这个项目也适用哦~~

上图：

```

<build>
  <pluginManagement>
    <plugins>
      <plugin>
        <groupId>com.mycila.maven-license-plugin</groupId>
        <artifactId>maven-license-plugin</artifactId>
        <configuration>
          <header>../src/main/resources/etc/header.txt</header>
        </configuration>
      </plugin>
    </plugins>
  </pluginManagement>
</build>

<build>
  <resources>
    <resource>
      <directory>src/main/resources</directory>
      <excludes>
        <exclude>etc</exclude>
      </excludes>
    </resource>
  </resources>
  <pluginManagement>
    <plugins>
      <plugin>
        <groupId>org.eclipse.jetty</groupId>
        <artifactId>jetty-maven-plugin</artifactId>
        <version>${jetty.version}</version>
        <configuration>
          <httpConnector>
            <port>8080</port>
          </httpConnector>
          <stopKey>stop</stopKey>
          <stopPort>5500</stopPort>
          <webAppConfig>
            <contextPath>/</contextPath>
          </webAppConfig>
        </configuration>
      </plugin>
    </plugins>
  </pluginManagement>
</build>

```
