<p>之前一直用https来push到github上,今天试了下用ssh,把origin改为ssh地址后,用<a href="http://lib.csdn.net/base/git" class="replace\_word" title="Git知识库" target="\_blank">Git</a>&nbsp;push -u origin master出现错误:</p>  
<p>&nbsp;</p>  
<div class="dp-highlighter bg\_plain">  
<div class="bar">  
<div class="tools"><strong>[plain]</strong>&nbsp;<a href="http://blog.csdn.net/xzz\_hust/article/details/8969090" class="ViewSource" title="view plain">view plain</a><span data-mod="popu\_168"><span data-mod="popu\_168">&nbsp;<a href="http://blog.csdn.net/xzz\_hust/article/details/8969090" class="CopyToClipboard" title="copy">copy</a></span></span>  
<div>&nbsp;</div>  
</div>  
</div>  
<ol start="1">  
<li class="alt"><span><span>Permission&nbsp;denied&nbsp;(publickey).&nbsp;&nbsp;</span></span></li>  
<li><span>fatal:&nbsp;The&nbsp;remote&nbsp;end&nbsp;hung&nbsp;up&nbsp;unexpectedly&nbsp;&nbsp;</span></li>  
</ol></div>  
<p><br /><span>上网搜了一下,原因是'</span><span>You've probably not added a public key to your SSH keys.</span><span>'</span></p>  
<p>&nbsp;</p>  
<p>解决方法如下:</p>  
<p>用下面的命令生成public key</p>  
<p>&nbsp;</p>  
<pre><code>\$ ssh-keygen -t rsa</code></pre>  
<p>&nbsp;</p>  
<p>复制 public key (<code>id\_rsa.pub</code>) 到你账户的&nbsp;<a href="https://github.com/settings/ssh" rel="nofollow">list of SSH keys</a>, 再重新push.</p>
