使用命令

```
sudo cp /etc/apt/sources.list /etc/apt/sources.list.bak #备份源文件
sudo vim /etc/apt/sources.list #修改源文件
sudo apt-get update #更新列表
```

配置源文件

将 sources.list 文件内容替换如下

```
deb http://mirrors.aliyun.com/ubuntu/ trusty main restricted universe multiverse
deb http://mirrors.aliyun.com/ubuntu/ trusty-security main restricted universe multiverse
deb http://mirrors.aliyun.com/ubuntu/ trusty-updates main restricted universe multiverse
deb http://mirrors.aliyun.com/ubuntu/ trusty-proposed main restricted universe multiverse
deb http://mirrors.aliyun.com/ubuntu/ trusty-backports main restricted universe multiverse
deb-src http://mirrors.aliyun.com/ubuntu/ trusty main restricted universe multiverse
deb-src http://mirrors.aliyun.com/ubuntu/ trusty-security main restricted universe multiverse
deb-src http://mirrors.aliyun.com/ubuntu/ trusty-updates main restricted universe multiverse
deb-src http://mirrors.aliyun.com/ubuntu/ trusty-proposed main restricted universe multivers
e
deb-src http://mirrors.aliyun.com/ubuntu/ trusty-backports main restricted universe multiver
e
```

Ubuntu版本

不同ubuntu版本，源配置不太相同，对照下面表格替换文件中相应位置

```
<table class="table table-striped-white table-bordered" data-anchor-id="dcve">
<thead>
<tr>
<th>Ubuntu version</th>
<th>Repository</th>
</tr>
</thead>
<tbody>
<tr>
<td>Precise 12.04 (LTS)</td>
<td>deb <a target="_blank" href="https://apt.dockerproject.org/repo">https://apt.dockerp
object.org/repo</a> ubuntu-precise main</td>
</tr>
<tr>
<td>Trusty 14.04 (LTS)</td>
<td>deb <a target="_blank" href="https://apt.dockerproject.org/repo">https://apt.dockerp
object.org/repo</a> ubuntu-trusty main</td>
</tr>
<tr>
<td>Wily 15.10</td>
<td>deb <a target="_blank" href="https://apt.dockerproject.org/repo">https://apt.dockerp
object.org/repo</a> ubuntu-wily main</td>
</tr>
```

```
</tr>
<tr>
  <td>Xenial 16.04 (LTS)</td>
  <td>deb <a target="_blank" href="https://apt.dockerproject.org/repo">https://apt.dockerp
object.org/repo</a> ubuntu-xenial main</td>
</tr>
</tbody>
</table>
```

比如16.04版本,执行以下命令

```
sudo vim /etc/apt/sources.list # 打开源配置文件
:%s/trusty/xenial/g # 执行vim命令>>全局替换trusty为xenial
:wq! # 保存文件并退出
sudo apt update && sudo apt upgrade # 更新软件源并升级可更新软件 (非必须执行)
```
