ERROR StatusLogger No log4j2 configuration file found. Using default configuration: logging only errors to the console.

报这个异常是因为没有log4j2.xml这个文件，创建一个就好

以下是log4j2.xml的内容呢

```
<?xml version="1.0" encoding="UTF-8"?>
<Configuration>
  <Appenders>
    <Console name="STDOUT" target="SYSTEM_OUT">
      <PatternLayout pattern="%d %-5p [%t] %C{2} (%F:%L) - %m%n"/>
    </Console>
    <RollingFile name="RollingFile" fileName="logs/strutslog1.log"
      filePattern="logs/${date:yyyy-MM}/app-%d{MM-dd-yyyy}-%i.log.gz">
      <PatternLayout>
        <Pattern>%d{MM-dd-yyyy} %p %c{1.} [%t] -%M-%L- %m%n</Pattern>
      </PatternLayout>
      <Policies>
        <TimeBasedTriggeringPolicy />
        <SizeBasedTriggeringPolicy size="1 KB"/>
      </Policies>
      <DefaultRolloverStrategy fileIndex="max" max="2"/>
    </RollingFile>
  </Appenders>
  <Loggers>
    <Logger name="com.opensymphony.xwork2" level="WAN"/>
    <Logger name="org.apache.struts2" level="WAN"/>
    <Root level="warn">
      <AppenderRef ref="STDOUT"/>
    </Root>
  </Loggers>
</Configuration>
```
