

链滴

出现 "Failed to decode downloaded font" 和 "OTS parsing error: Failed to convert WOFF 2.0 font to SFNT";

在maven项目中，前端二进制图标显示不出来。

包如下错误

出现"Failed to decode downloaded font"和"OTS parsing error: Failed to convert WOFF 2.0 font to SFNT"

因为经过maven的filter，会破坏font文件的二进制文件格式，到时前台解析出错

我的pom配置

```
<resource>
  <directory>src/main/resources</directory>
  <filtering>true</filtering>
  <excludes>
    <exclude>static/assets/style/**</exclude>
  </excludes>
</resource>
```

改为

```
<resource>
  <directory>src/main/resources</directory>
  <filtering>true</filtering>
  <excludes>
    <exclude>static/assets/style/**</exclude>
  </excludes>
</resource>

<resource>
  <directory>src/main/resources</directory>
  <filtering>>false</filtering>
  <includes>
    <include>static/assets/style/**</include>
  </includes>
</resource>
```
