```
<p>1.动态创建 select</p>
<blockquote>
<p>function createSelect() {<br>
var mySelect = document.createElement("select");<br>
mySelect.id = "mySelect";<br>
document.body.appendChild(mySelect);<br>
}</p>
</blockquote>
<p>2.添加选项 option</p>
<blockquote>
<p>function addOption() {<br>
//根据 id 查找对象, <br>
var obj = document.getElementById('mySelect');<br>
//添加一个选项<br>
obj.add(new Option("文本", "值")); //方法一<br>
obj.options.add(new Option("text", "value")); //方法二<br>
for(var i = 0; i &lt; 10; i++) {<br>
obj.options[i] = new Option("新文本", "新值"); //方法三<br>
}<br>
}</p>
</blockquote>
<p>3.删除所有选项 option</p>
<blockquote>
<p>function removeAll() {<br>
var obj = document.getElementById('mySelect');<br>
obj.options.length = 0;<br>
}</p>
</blockquote>
<p>4.删除一个选项 option</p>
<blockquote>
<p>function removeOne() {<br>
var obj = document.getElementById('mySelect');<br>
var index = obj.selectedIndex; //index,要删除选项的序号<br>
obj.options.remove(index);<br>
}</p>
</blockquote>
<p>5.获得选项 option 的值</p>
<blockquote>
<p>var obj = document.getElementById('mySelect');<br>
var index = obj.selectedIndex; //序号, 取当前选中选项的序号<br>
var val = obj.options[index].value;</p>
</blockquote>
<p>6.获得选项 option 的文本</p>
<blockquote>
<p>var obj = document.getElementById('mySelect');<br>
var index = obj.selectedIndex;<br>
var val = obj.options[index].text;</p>
</blockquote>
<p>7.修改选项 option</p>
<blockquote>
<p>var obj = document.getElementById('mySelect');<br>
var index = obj.selectedIndex;<br>
var val = obj.options[index] = new Option("新文本", "新值");</p>
</blockquote>
```

<p>8.删除 select</p>

<blockquote>

<p>function removeSelect() {

var mySelect = document.getElementById("mySelect");

mySelect.parentNode.removeChild(mySelect);

}</p>

</blockquote>
