三行代码实现谷歌反代 nginx 里新建 server

```
server {
    listen      443 ssl;
    server_name google.uulucky.com;
    ssl on;
    ssl_certificate encrypt/google.uulucky.com.pem;
    ssl_certificate_key encrypt/google.uulucky.com.key;
    ssl_session_timeout 5m;
    ssl_ciphers ECDHE-RSA-AES128-GCM-SHA256:ECDHE:ECDH:AES:HIGH:!NULL:!aNULL:!M
5:!ADH:!RC4;
    ssl_protocols TLSv1 TLSv1.1 TLSv1.2;
    ssl_prefer_server_ciphers on;

    access_log logs/google.access.log;

    location / {
        proxy_pass https://www.google.com.hk;
        proxy_redirect ~^https://www.google.com.hk(*) https://google.uulucky.com$1;
        proxy_redirect ~^https://www.google.com.(*) https://google.uulucky.com$1;
    }
}
```
