使用RubyMine新建gem工程后，运行helloworld程序报错，错误信息如下：

```
"D:\Program Files\Ruby24-x64\bin\ruby.exe" -e $stdout.sync=true;$stderr.sync=true;load($0
ARGV.shift) D:/rubymine_projects/helloworld/lib/helloworld.rb
D:/Program Files/Ruby24-x64/lib/ruby/2.4.0/rubygems/core_ext/kernel_require.rb:55:in `requi
e': cannot load such file -- helloworld/version (LoadError)
  from D:/Program Files/Ruby24-x64/lib/ruby/2.4.0/rubygems/core_ext/kernel_require.rb:55:i
`require'
  from D:/rubymine_projects/helloworld/lib/helloworld.rb:1:in `<top (required)>'
  from -e:1:in `load'
  from -e:1:in `<main>'
```

Process finished with exit code 1

原因是helloworld.rb文件中使用了require关键字引用了相对路径：

```
require "helloworld/version"
```

```
module Helloworld
  # Your code goes here...
  puts "hello";
end
```

将require修改为require_relative后，问题解决。
