<blockquote>
<p>错误信息: An error occurred while deploying the file. This probably means that the app contains ARM native code and your Genymotion device cannot run ARM instructions. You should either build your native code for x86 or install an ARM translation tool on your device.</p>
</blockquote>

<h3 id="解决方案">解决方案</h3>
<blockquote>
<p>首先, 打开 genymotion, 设置 adb:setting- > 将默认 genymotion 的 adb 改为 custom android sdk, 路径指向本地 sdk 安装路径。如图:

</p>
</blockquote>
<p>打开模拟器之后, CMD 中依次执行: </p>
<blockquote>
<p>① cd C:\Program Files\Genymobile\Genymotion\tools

</p>
</blockquote>
<hr>
<blockquote>
<p>② gapps-kk-20140105-signed.zip
密码: nbkc</p>
</blockquote>

adb push C:\fastwork\Work\RfStudy\App\gapps-kk-20140105-signed.zip /sdcard/Download/
adb shell flash-archive.sh /sdcard/download/gapps-kk-20140105-signed.zip

<blockquote>
<p>③ Genymotion-ARM-Translation.zip
> 密码: gjtp</p>
</blockquote>

adb push C:\fastwork\Work\RfStudy\App\Genymotion-ARM-Translation.zip /sdcard/Download/
adb shell flash-archive.sh /sdcard/download/Genymotion-ARM-Translation.zip

<hr>
