报错:1130-host ... is not allowed to connect to this MySQL server

解决方法:

1. 改表法。

可能是你的帐号不允许从远程登陆,只能在localhost。这个时候只要在localhost的那台电脑,登入mysql后,更改 "mysql" 数据库里的 "user" 表里的 "host" 项,从"localhost"改称"%"

```
mysql -u root -pvmwaremysql>use mysql;
```

```
mysql>update user set host = '%' where user = 'root';
```

```
mysql>select host, user from user;
```

```
FLUSH PRIVILEGES;
```

2. 授权法。

例如,你想myuser使用mypassword从任何主机连接到mysql服务器的话。

```
GRANT ALL PRIVILEGES ON . TO 'myuser'@'%' IDENTIFIED BY 'mypassword' WITH GRANT OPTION;
```

```
FLUSH PRIVILEGES;
```

如果你想允许用户myuser从ip为192.168.1.6的主机连接到mysql服务器,并使用mypassword作为密码

```
GRANT ALL PRIVILEGES ON . TO 'myuser'@'192.168.1.3' IDENTIFIED BY 'mypassword' WITH GRANT OPTION;
```

```
FLUSH PRIVILEGES;
```

如果你想允许用户myuser从ip为192.168.1.6的主机连接到mysql服务器的dk数据库,并使用mypassword作为密码

```
GRANT ALL PRIVILEGES ON dk.* TO 'myuser'@'192.168.1.3' IDENTIFIED BY 'mypassword' WITH GRANT OPTION;
```

```
FLUSH PRIVILEGES;
```

这样就可以在其它任何的主机上以root身份登录啦!
