## erp\_entity 模块

在 erp\_entity 模块中添加 Dep 实体类 和 dep.hbm.xml 映射文件

dep 实体类

```

public class Dep {

    private Long uuid;
    private String name;
    private String tele;

    public Long getUuid() {
        return uuid;
    }
    public void setUuid(Long uuid) {
        this.uuid = uuid;
    }
    public String getName() {
        return name;
    }
    public void setName(String name) {
        this.name = name;
    }
    public String getTele() {
        return tele;
    }
    public void setTele(String tele) {
        this.tele = tele;
    }
}

```

dep.hbm.xml 映射文件

```

<?xml version='1.0' encoding='utf-8'?>
<!DOCTYPE hibernate-mapping PUBLIC
    "-//Hibernate/Hibernate Mapping DTD 3.0//EN"
    "http://www.hibernate.org/dtd/hibernate-mapping-3.0.dtd">
<hibernate-mapping>

    <class name="xin.liuyishi.erp.entity.Dep" table="dep">
        <id name="id">
            <column name="id"/>
            <generator class="native"/>
        </id>
        <property name="name"/>
        <property name="tele"/>
    </class>
</hibernate-mapping>

```

## erp\_dao 模块

DepDapImpl 类

```

```
@SuppressWarnings("all")
