url: www.twilio.com

可以给手机发短信，打电话啥的。

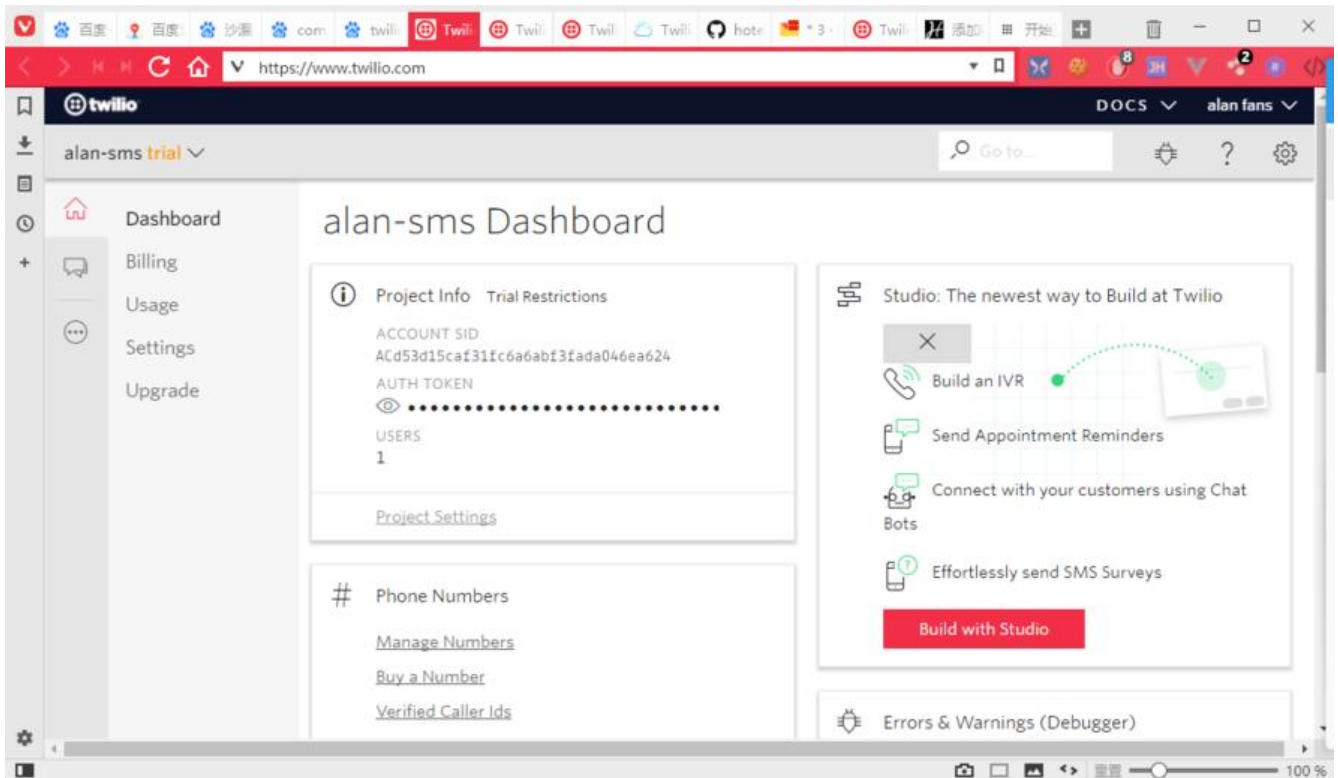

额度见: <http://blog.csdn.net/zxjohnson/article/details/79350151>

可以用textnow的号码注册，接收注册验证码。

昨天看ibm服务有个sms

注册twilio(需要爱国),

重要的是

Twilio Account SID

Twilio Auth Token

Twilio Phone Number (Twilio给的号码)

[github:https://github.com/twilio/twilio-java](https://github.com/twilio/twilio-java)

```
<dependency>
  <groupId>com.twilio.sdk</groupId>
  <artifactId>twilio-java-sdk</artifactId>
  <version>7.0.0-rc-10</version>
</dependency>
```

```
import com.twilio.sdk.Twilio;
import com.twilio.sdk.creator.api.v2010.account.MessageCreator;
import com.twilio.sdk.resource.api.v2010.account.Message;
import com.twilio.sdk.type.PhoneNumber;
```

```
public class TwilioUtils {
```

```
    String accountSid = "Your Account SID"; // Your Account SID from www.twilio.com/user/account
```

```
    String authToken = "Your Auth Token"; // Your Auth Token from www.twilio.com/user/account
```

```
    public String sendSMS(String phone,String content) {
        Twilio.init(accountSid, authToken);
        MessageCreator messageCreator = Message.create(
            accountSid,
```

```
        new PhoneNumber(phone), // To number
        new PhoneNumber("Twilio Phone Number"), // From number
        content // SMS body
    );
    Message message = messageCreator.execute();
    return message.getSid();
}

public static void main(String[] args) {
    TwilioUtils twilioUtils = new TwilioUtils();
    twilioUtils.sendSMS("+86 183 XXX XXX", "hello world");
}
}
```

遇到问题:

Permission to send an SMS has not been enabled for the region indicated by XXXXXX

这个要在[网页](#)上勾选china

The number +86183XXXXXXX is unverified. Trial accounts cannot send messages to unverified numbers; verify +86183XXXXXXX at [twilio.com/user/account/phone-numbers/verified](https://www.twilio.com/user/account/phone-numbers/verified), or purchase a Twilio number to send messages to unverified numbers.

这个手机号在页面上验证一下: [twilio.com/user/account/phone-numbers/verified](https://www.twilio.com/user/account/phone-numbers/verified)
