在nginx中错误使用了全站https, 去掉那个限制即可

启用 SSL 配置

```
ssl_prefer_server_ciphers on;
```

```
ssl_protocols TLSv1 TLSv1.1 TLSv1.2;  
ssl_ciphers "EECDH+ECDSA+AESGCM EECDH+aRSA+AESGCM EECDH+ECDSA+SHA384 EEC  
H+ECDSA+SHA256 EECDH+aRSA+SHA384 EECDH+aRSA+SHA256 EECDH+aRSA+RC4 EECD  
EDH+aRSA !aNULL !eNULL !LOW !3DES !MD5 !EXP !PSK !SRP !DSS !RC4";  
keepalive_timeout 70;  
ssl_session_cache shared:SSL:10m;  
ssl_session_timeout 10m;
```

```
add_header Strict-Transport-Security max-age=63072000;  
add_header X-Frame-Options DENY;  
add_header X-Content-Type-Options nosniff;
```

强制全站使用HTTPS (如果不想全部使用HTTPS, 请注释掉下面三行)

```
#add_header Strict-Transport-Security max-age=63072000;  
#add_header X-Frame-Options DENY;  
#add_header X-Content-Type-Options nosniff;
```
