在项目中使用到了sun.security.pkcs10这个包，项目是基于Maven构建的，所以在进行编译打包的过程中，出现Maven找不到依赖的错误

错误信息

[INFO] BUILD FAILURE

[ERROR] Failed to execute goal org.apache.maven.plugins:maven-compiler-plugin:3.1:compile (default-compile) on project jks-core: Compilation failure: Compilation failure:

[ERROR] /usr/local/tomcat/project/jks-core/src/main/java/com/liumapp/jks/core/adapter/KeStoreAdapter.java:[8,27] package sun.security.pkcs10 does not exist

[ERROR] /usr/local/tomcat/project/jks-core/src/main/java/com/liumapp/jks/core/certificate/CR.java:[3,27] package sun.security.pkcs10 does not exist

解决办法

Maven在编译项目的时候，一些内部包，比如sun.security.pkcs10默认是被隐藏的，除非我们将"-XD ignore.symbol.file"这个选项，添加在maven-compiler-plugin插件下：

```
<plugin>
  <groupId>org.apache.maven.plugins</groupId>
  <artifactId>maven-compiler-plugin</artifactId>
  <version>3.2</version>
  <configuration>
    <fork>true</fork>
    <compilerArgument>-XDignore.symbol.file</compilerArgument>
  </configuration>
</plugin>
```
