<p>Today is tuesday ,it's cloudy now, but it's heavy rain before a few minutes.

I'm in the company, I finished my work at last week's friday, but my leader planned finish this work at this week's friday,

so I have more free time now. I think present's work is so easy for me ,I can always advance finish my work , and then I can study english in rest of the time.

I fell that my english than before a little better,I touch english everyday, such as I see them when I by subway, and I use them in my work. I don't know if I like this language, but I know if I'm english very well, I can get better job offer and more money, because

a lot of computer technology is born in english-speaking countries. I'm a programmer, I like my work. I hate overtime, I always overtime when I'm at previous company . My previous company is a game's company,that boss says "Tencent was get great success, but Tencent's staff still overtime everyday. why we're no overtime ?" </p>
