<blockquote>

<p>Java8 对 JavaDoc 的语法检查非常严格，我在进行 Maven 编译发布项目到 Maven Center 的过程中，经常产生因为 JavaDoc 编译失败造成发布失败，但是很多情况下，都是一两个 @param 参数有写全，@return 没有写之类的问题，为此，我觉得非常有必要忽略这些异常。 </p>

</blockquote>

<h2 id="问题描述">问题描述</h2>

<p>各位应该都知道发布一个 Maven 项目到 Maven 的中央仓库是必须要有 JavaDoc，而我们在使用 Maven JavaDoc plugin 的过程中，一旦出现某些类似于此的问题： </p>

```
<pre><code class="highlight-chroma"><span class="highlight-line"><span class="highlight-cl">Failed to execute goal org.apache.maven.plugins:maven-javadoc-plugin:2.7:jar (attach-javadocs) on project [projectname]: MavenReportException: Error while creating archive:
```

```
</span></span><span class="highlight-line"><span class="highlight-cl">Exit code: 1 - [path-to-file]:[linenumber]: warning: no description for @param
```

```
</span></span></code></pre>
```

<p>都会造成整个发布过程失败，解决办法一般是一个一个的把这些 @param 加上，一两个还好如果您的项目有成千上万个呢？ </p>

<h2 id="解决办法">解决办法</h2>

<p>直接修改 Maven JavaDoc plugin 的配置，忽略这些错误： </p>

```
<pre><code class="highlight-chroma"><span class="highlight-line"><span class="highlight-cl">&lt;plugin&gt;
```

```
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;groupId&gt;
```

```
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;/groupId&gt;
```

```
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;artifactId&gt;
```

```
</span></span><span class="highlight-line"><span class="highlight-cl"> maven-javadoc-plugin&lt;/artifactId&gt;
```

```
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;version&gt;2
```

```
</span></span><span class="highlight-line"><span class="highlight-cl"> 10.3&lt;/version&gt;
```

```
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;executions&
```

```
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;execution&
```

```
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;id&gt;atta
```

```
</span></span><span class="highlight-line"><span class="highlight-cl"> h-javadocs&lt;/id&gt;
```

```
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;goals&gt;
```

```
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;goal&gt;
```

```
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;/goal&gt;
```

```
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;/goals&gt;
```

```
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;configurat
```

```
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;additional
```

```
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;param&gt;-Xdoclint:none&lt;/additionalparam&gt;
```

```
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;/configurat
```

```
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;/execution
```

```
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;/executions
```

```
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;/executions
```

```
</span></span><span class="highlight-line"><span class="highlight-cl"> &lt;/plugin&gt;
```

```
</span></span></code></pre>
```

<p>经过测试，忽略后项目可以正常发布，不会有什么影响。 </p>
