一、升级gitlab到最新版本

1. Make a backup (Optional)

If you would like to make a backup before updating, the below command will backup data in var/opt/gitlab/backups by default.

```
<table><tr><td bgcolor=#FFFF00>sudo gitlab-rake gitlab:backup:create STRATEGY=copy</td></tr></table>
```

2. Update GitLab

Update to the latest version of GitLab.

```
<table><tr><td bgcolor=#FFFF00>sudo yum install -y gitlab-ce</td></tr></table>
```

二、升级runner到最新版本

For RHEL/CentOS/Fedora

```
<table><tr><td bgcolor=#FFFF00>sudo yum update</td></tr></table>
<table><tr><td bgcolor=#FFFF00>sudo yum install gitlab-runner</td></tr></table>
```
