source link: [Resolve the Amazon\(AWS\) EC2 Linux Install OpenResty with repomd.xml return 404 error](#)

When install the OpenResty on Amazon(AWS) EC2 Linux Maybe have the follow error:

https://openresty.org/package/amazon/2/x86_64/repodata/repomd.xml: [Errno 14] HTTPS Error 404 - Not Found

resolve method

modify the config file openresty.repo, change the baseurl tag content value of "\$releasever" to "latest", the steps are as follows:

1. sudo vim /etc/yum.repos.d/openresty.repo
2. change the baseurl tag content value of "\$releasever" to "latest", the changed as follow:
baseurl=[https://openresty.org/package/amazon/latest/\\$basearch](https://openresty.org/package/amazon/latest/$basearch)

Remarks:

the steps of install OpenResty on Amazon(AWS) EC2 Linux as follows:

add openresty repo:

```
sudo yum install yum-utils  
sudo yum-config-manager --add-repo https://openresty.org/package/amazon/openresty.repo
```

install openresty

```
sudo yum install openresty
```

if you want to install resty command tools, only need install openresty-resty

```
sudo dnf install openresty-resty
```
