You have requested an early access with the fa241911-ovh OVH account and we are really excited to finalize the delivery of your service!

Access to your service

Please click below, login, validate the contract (**do not miss the captcha at the end**) and wait a bit for the magic to operate!

10 minutes later you will then find the **Kubernetes service** under the "Platform and Services" section in the "Cloud" universe of your OVH Control panel.

Just download the kubeCTL CLI tool, add your first nodes in the control panel, and **have fun** with your containers !

[Get my Kubernetes cluster NOW!](#)

(This link will only be available for fa241911-ovh and during 7 days from this email)

As we really want you to enjoy that service, we also reward you with a first 50€ voucher of public cloud (or the equivalent amount in your local currency)

限制，相当于额度吧，我建出两个，有公网ip(ipv4, ipv6)

The number of resources for your Cloud project is limited to enable you to control your resource consumption.

If you need more resources, you can request them from our team by clicking on the button below.

[Increase my limits](#)

Location ↑	Servers	vCPU	RAM	Additional disk
Beauharnois (BHS3)	0 / 20	0 / 20	0 / 40.96 GB	0 / 20 TB

很多这这样的机器配置（我用来挖矿了）

Template	G2-15
CPU	4 vCores x 3.1 Ghz
RAM	15 GB RAM
GPU	1 x Nvidia GTX 1070 8GB
Disks	100 GiB Local SSD
Network	250 Mbps Bandwidth
Guaranteed resources	

选介绍这么多吧，我慢慢摸索中。。。。
