<p>I have witnessed that baidu recently blacklisted many user who frequently use third party application like speedpan or pandownload which enable free download from baidu network.
br>

Yesterday,I happen to discover existence of BND application and surprised that I can still download at decent speed(2~3mbps) from baidu network by using BND2 and I wonder if BND application is really free from any restriction or bandwidth limit which conducted by baidu network
</p>

<p>I don't want to be blacklisted and they repeat to limit my baidu account's bandwidth terribly(5~30kb/s) So I really want to ascertain that too frequently usage of BND or BND2 will not lead to blacklist.

Thank you in advance. and I'm looking for your reply!</p>
