<p><strong>说明: </strong><code>Aria2</code> 作为一款 <code>linux</code> 下的下神器, 可以下载 <code>http</code> 资源、种子文件、磁力链接等, 功能强大, 就不过多介绍了此前提到过 <code>Aria2</code> 安装方法, 这里再说个逗比大佬的一键脚本, 很方便, 推荐使用</p>

<h2 id="安装">安装</h2>

<p>这里只提到了搭建后端, 前端可以参考: <a href="https://ld246.com/forward?goto=https%A%2F%2Fwww.fncat.com%2Farticles%2F2019%2F01%2F22%2F1548139026650.html" target=\_blank" rel="nofollow ugc">AriaNg 安装教程</a>。</p>

<p><strong>系统要求: </strong><code>CentOS 7+</code>/<code>Debian 6+</code>/<code>Ubuntu 14.04+</code></p>

<p>推荐 <code>Debian 7 x64</code>, 这个是脚本作者使用的系统, 脚本在这个系统上面出错最低。<br>

本人使用的是树莓派 3B+,也能完美运行</p>

<p>首先获取 root 权限</p>

<blockquote>

<p>sudo su root</p>

</blockquote>

<p>执行下面的代码下载并运行脚本: </p>

<blockquote>

<p>wget -N --no-check-certificate <a href="https://ld246.com/forward?goto=https%3A%2F%2Fraw.githubusercontent.com%2FToyoDAdoubiBackup%2Fdoubi%2Fmaster%2Faria2.sh" target=\_blank" rel="nofollow ugc">https://raw.githubusercontent.com/ToyoDAdoubiBackup/doubi/master/aria2.sh</a> &amp;&amp; chmod +x aria2.sh &amp;&amp; bash aria2.sh<br>#备用地址<br>

wget -N --no-check-certificate <a href="https://ld246.com/forward?goto=https%3A%2F%2Fraw.githubusercontent.com%2Fmolq%2Ffncat%2Fmaster%2Faria2.sh" target=\_blank" rel="nofollow ugc">https://raw.githubusercontent.com/molq/fncat/master/aria2.sh</a> &amp;&amp; chmod +x aria2.sh &amp;&amp; bash aria2.sh</p>

</blockquote>

<p>运行脚本后会出现脚本操作菜单, 选择并输入 <code>1</code> 就会开始安装。</p>

<h2 id="使用说明">使用说明</h2>

<p>进入下载脚本的目录并运行脚本: </p>

<pre><code class="highlight-chroma"><span class="highlight-line"><span class="highlight-cl">./aria2.sh</span></span><span class="highlight-line"><span class="highlight-cl"></span></span></code></pre>

<p>然后选择你要执行的选项即可。</p>

<pre><code class="highlight-chroma"><span class="highlight-line"><span class="highlight-cl">Aria2 一键安装管理脚本 [vx.x.x]</span></span><span class="highlight-line"><span class="highlight-cl">-- Toyo | doub.io/hell-jc4 --</span></span><span class="highlight-line"><span class="highlight-cl"></span></span><span class="highlight-line"><span class="highlight-cl">0\. 升级脚本</span></span><span class="highlight-line"><span class="highlight-cl">-----</span></span><span class="highlight-line"><span class="highlight-cl">1\. 安装 Aria2</span></span><span class="highlight-line"><span class="highlight-cl">2\. 卸载 Aria2</span></span><span class="highlight-line"><span class="highlight-cl">-----</span></span><span class="highlight-line"><span class="highlight-cl">3\. 启动 Aria2</span></span><span class="highlight-line"><span class="highlight-cl">4\. 停止 Aria2</span></span><span class="highlight-line"><span class="highlight-cl">5\. 重启 Aria2</span></span><span class="highlight-line"><span class="highlight-cl">-----</span></span></code></pre>
