对象克隆工具类

```
public class CloneUtils {  
    public static <T extends Serializable> T clone(T obj){  
        T cloneObj = null;  
        try {  
            ByteArrayOutputStream out = new ByteArrayOutputStream();  
            ObjectOutputStream obs = new ObjectOutputStream(out);  
            obs.writeObject(obj);  
            obs.close();  
            ByteArrayInputStream ios = new ByteArrayInputStream(out.toByteArray());  
            ObjectInputStream ois = new ObjectInputStream(ios);  
            cloneObj = (T) ois.readObject();  
            ois.close();  
        } catch (Exception e) {  
            e.printStackTrace();  
        }  
        return cloneObj;  
    }  
  
    @SuppressWarnings("unchecked")  
    public static <T> List<T> deepClone(List<T> src) throws IOException, ClassNotFoundException {  
        List<T> dest = null;  
        try {  
            ByteArrayOutputStream byteOut = new ByteArrayOutputStream();  
            ObjectOutputStream out = new ObjectOutputStream(byteOut);  
            out.writeObject(src);  
            ByteArrayInputStream byteIn = new ByteArrayInputStream(byteOut.toByteArray());  
            ObjectInputStream in = new ObjectInputStream(byteIn);  
            dest = (List<T>) in.readObject();  
        } catch (Exception e) {  
            e.printStackTrace();  
        }  
        return dest;  
    }  
}
```
