沐风

- 标准的 Java Web Tomcat 应用
- 标准的 Java Fatjar 应用
- 标准的 Spring Boot 应用
- 标准的 Go 应用

首先我这边先安装一个pycharm

安装过程不细说，安装完成如下

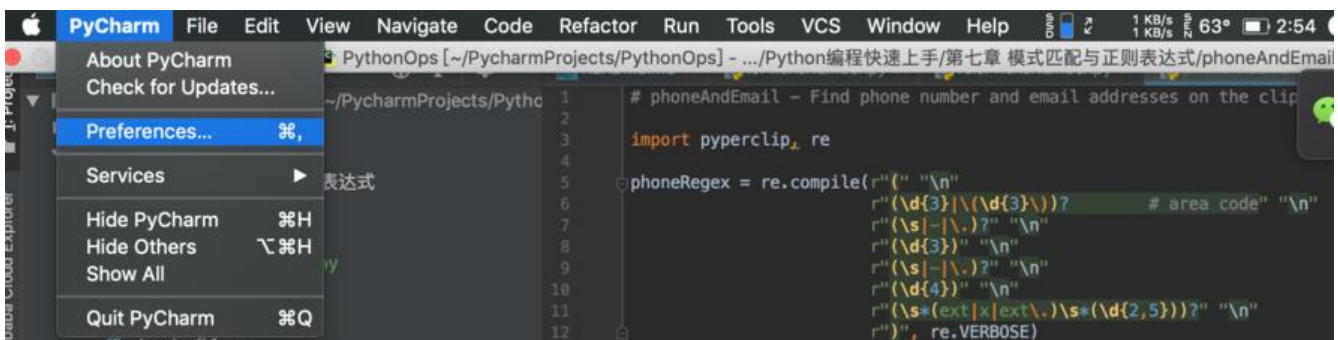

我这边安装的是2018.3.2版本的

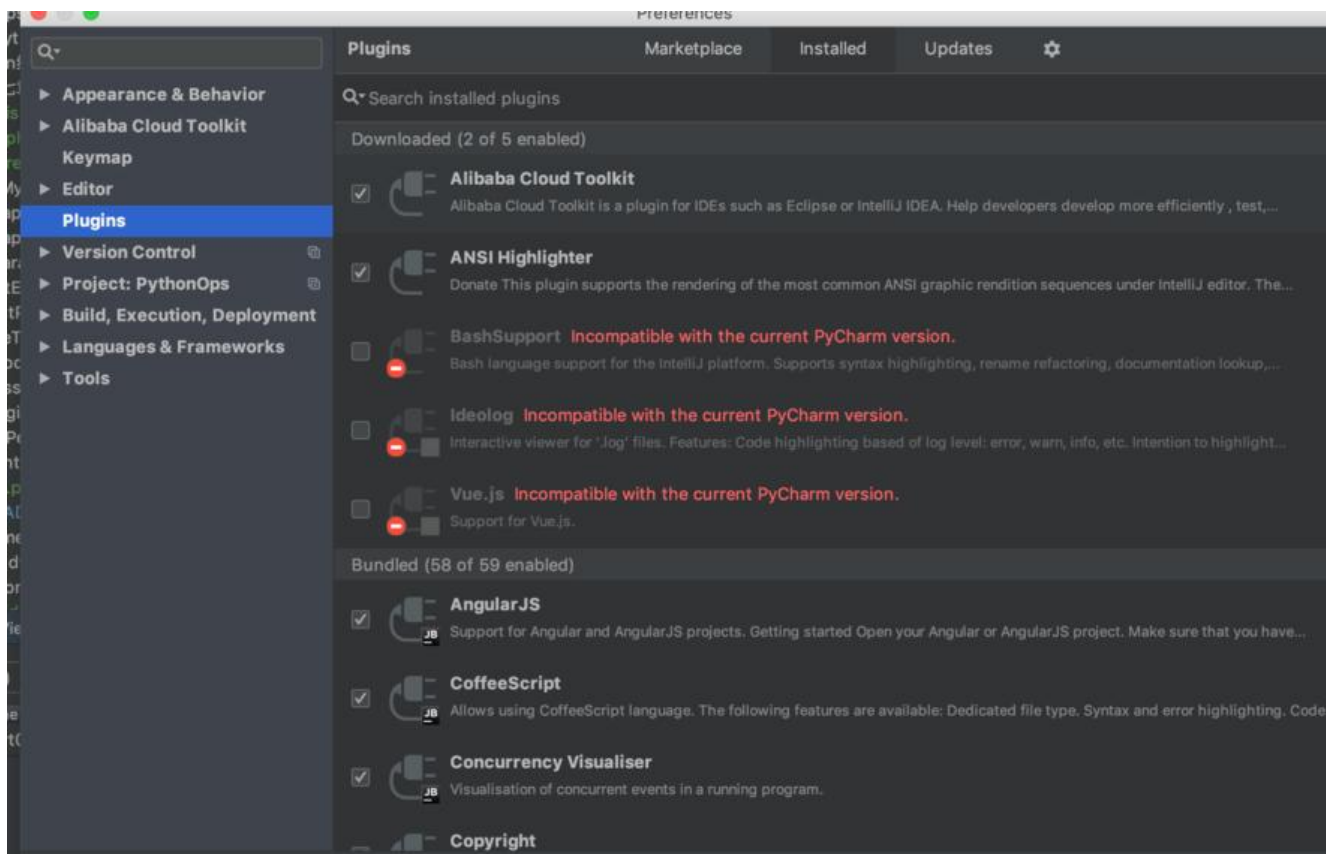

安装包下载地址：<https://yq.aliyun.com/attachment/download/?spm=a2c4e.11153940.blogcon692467.9.6c4078713zAkG3&id=6471>

安装插件

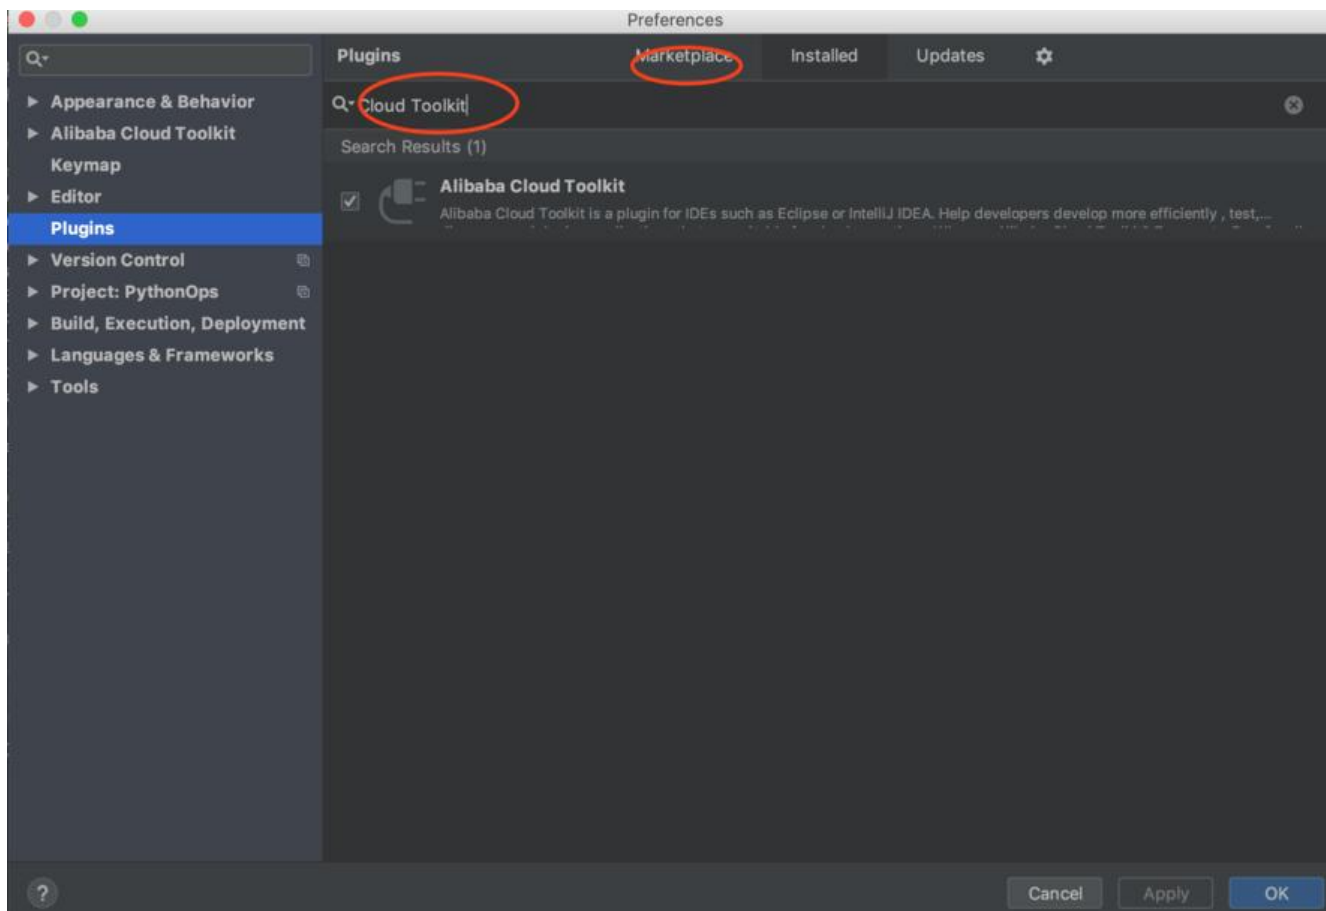

第一步 打开配置

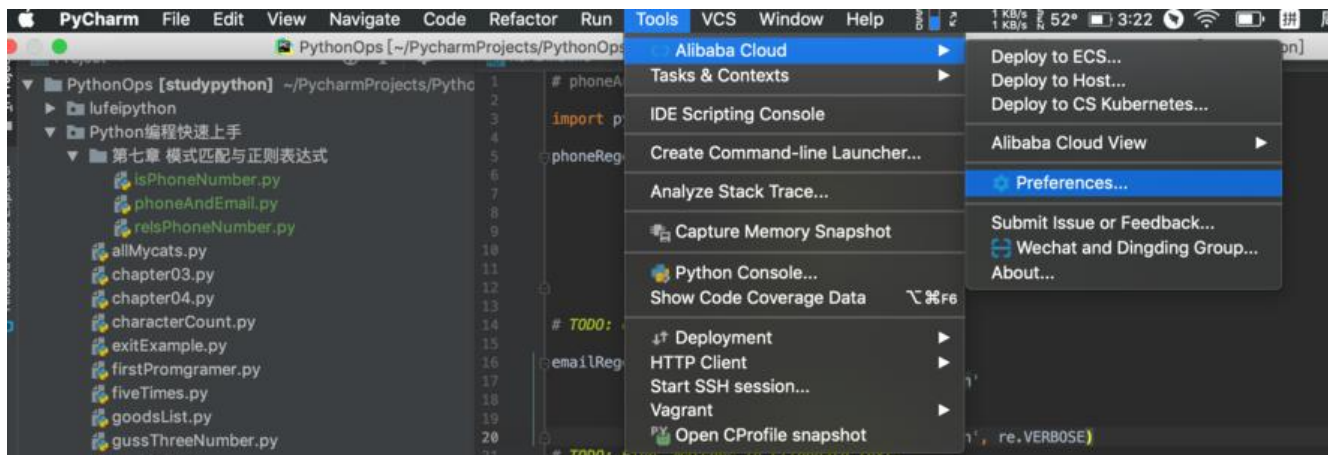

第二步 选择plugins

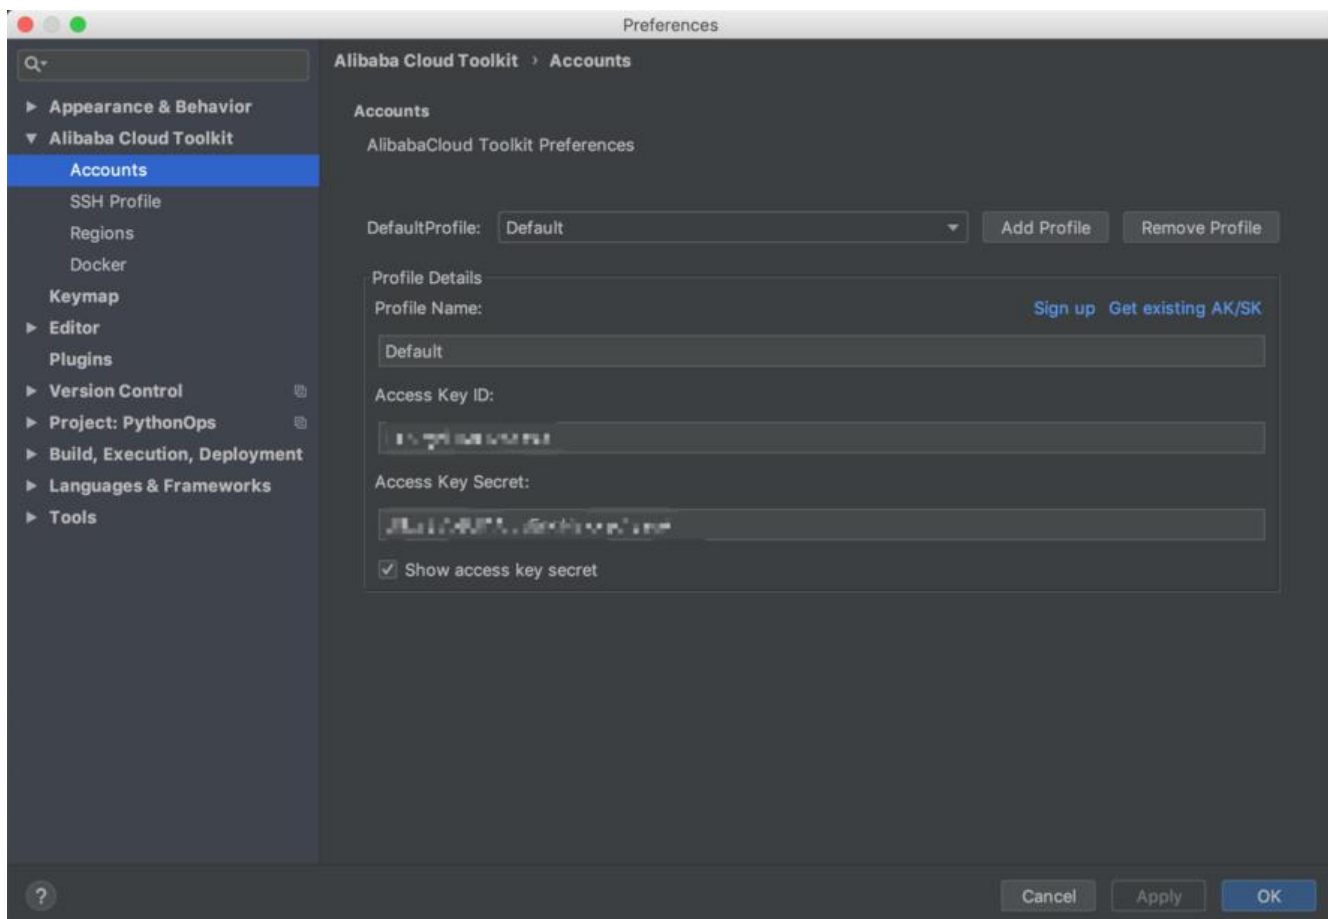

第三步 在marketplace搜索Cloud Toolkit

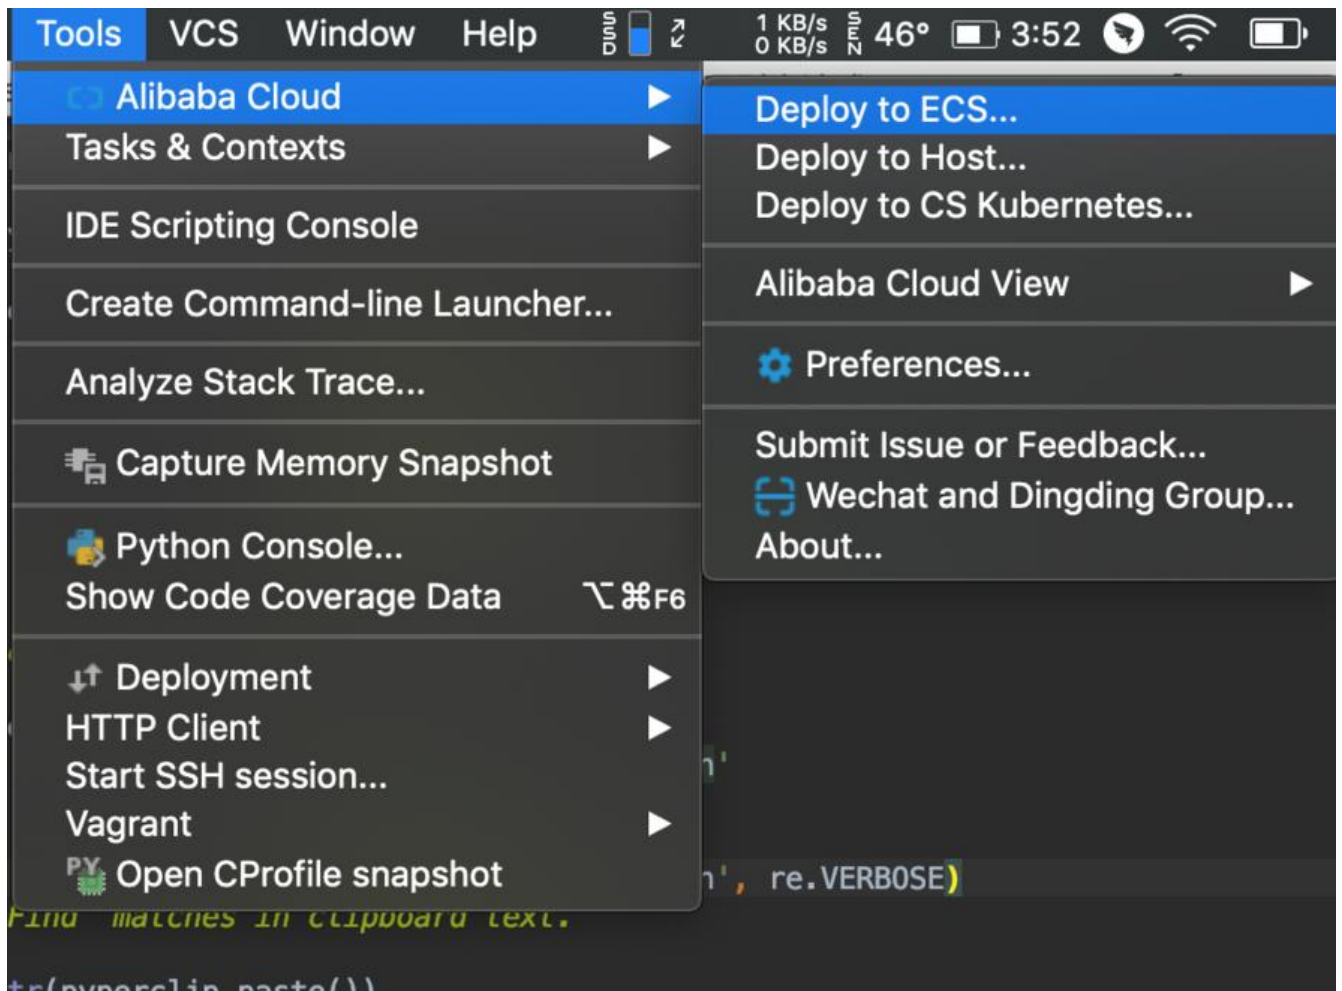

这边的话可能设计到pycharm插件下载源的配置，这边不做说明，有需要的朋友可以直接百度
到此我们的Cloud Toolkit已经安装完成了
配置我们的阿里云帐号ak

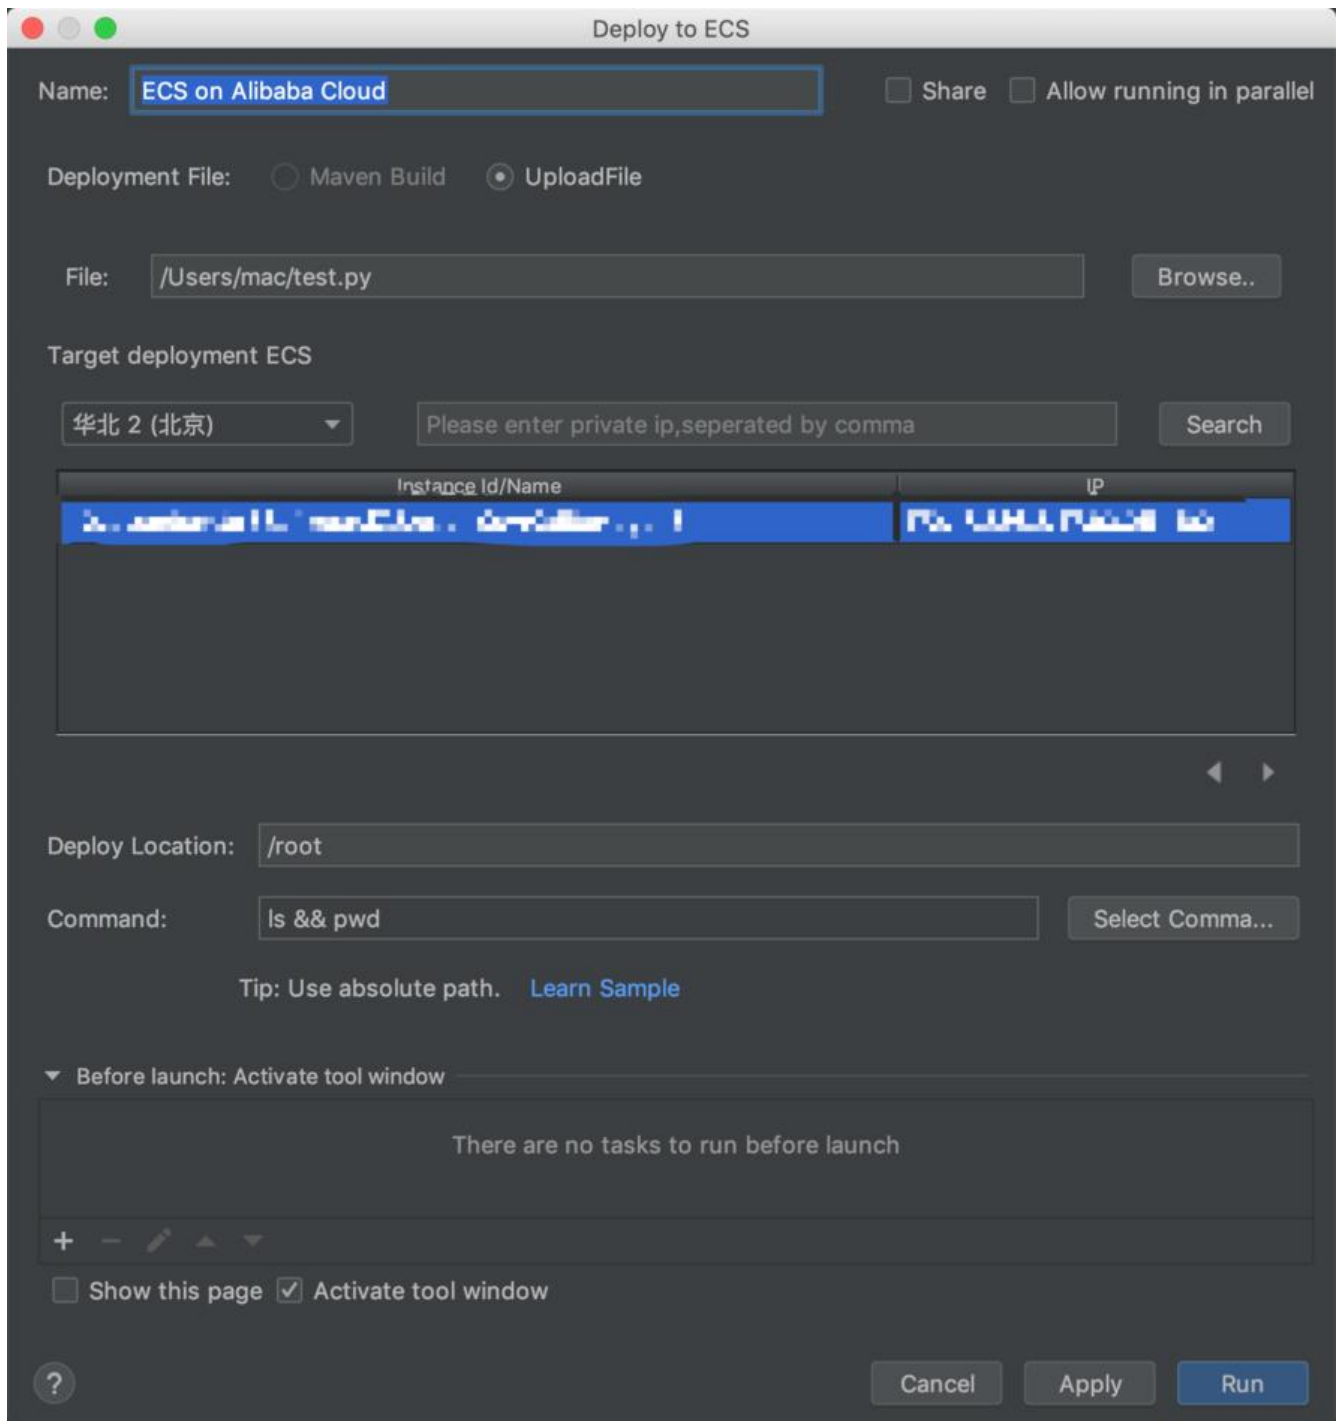

将你的阿里云的ak填入下面马赛克的地方

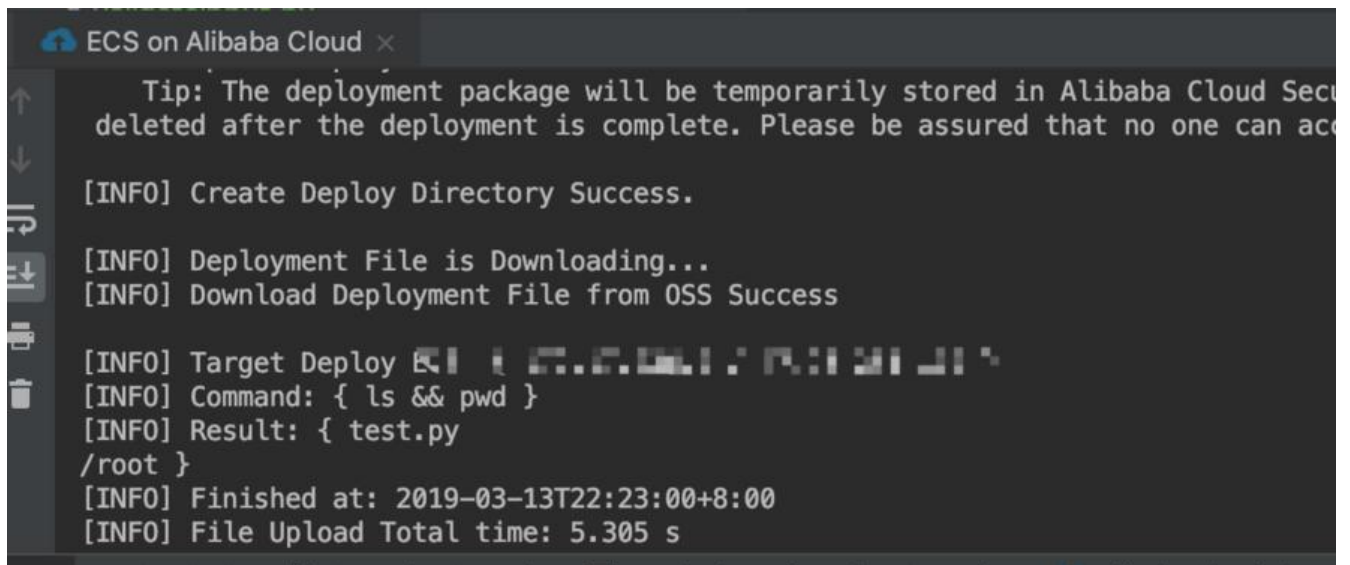

配置完之后我们测试下

我们这边测试下快速部署到阿里云，别问为什么因为只买的起ecs

我们将本地的test.py上传到服务器上的root下，并且执行 ll和pwd的命令

The image is a screenshot of a terminal window titled "ECS on Alibaba Cloud". It displays a series of status messages in a monospaced font. The messages indicate a successful deployment process, including directory creation, file downloading from OSS, and a successful file upload. A command to list files and get the current directory is shown, along with its output. The process concludes with a timestamp and the total upload time.

```
ECS on Alibaba Cloud x
Tip: The deployment package will be temporarily stored in Alibaba Cloud Secu
deleted after the deployment is complete. Please be assured that no one can acc

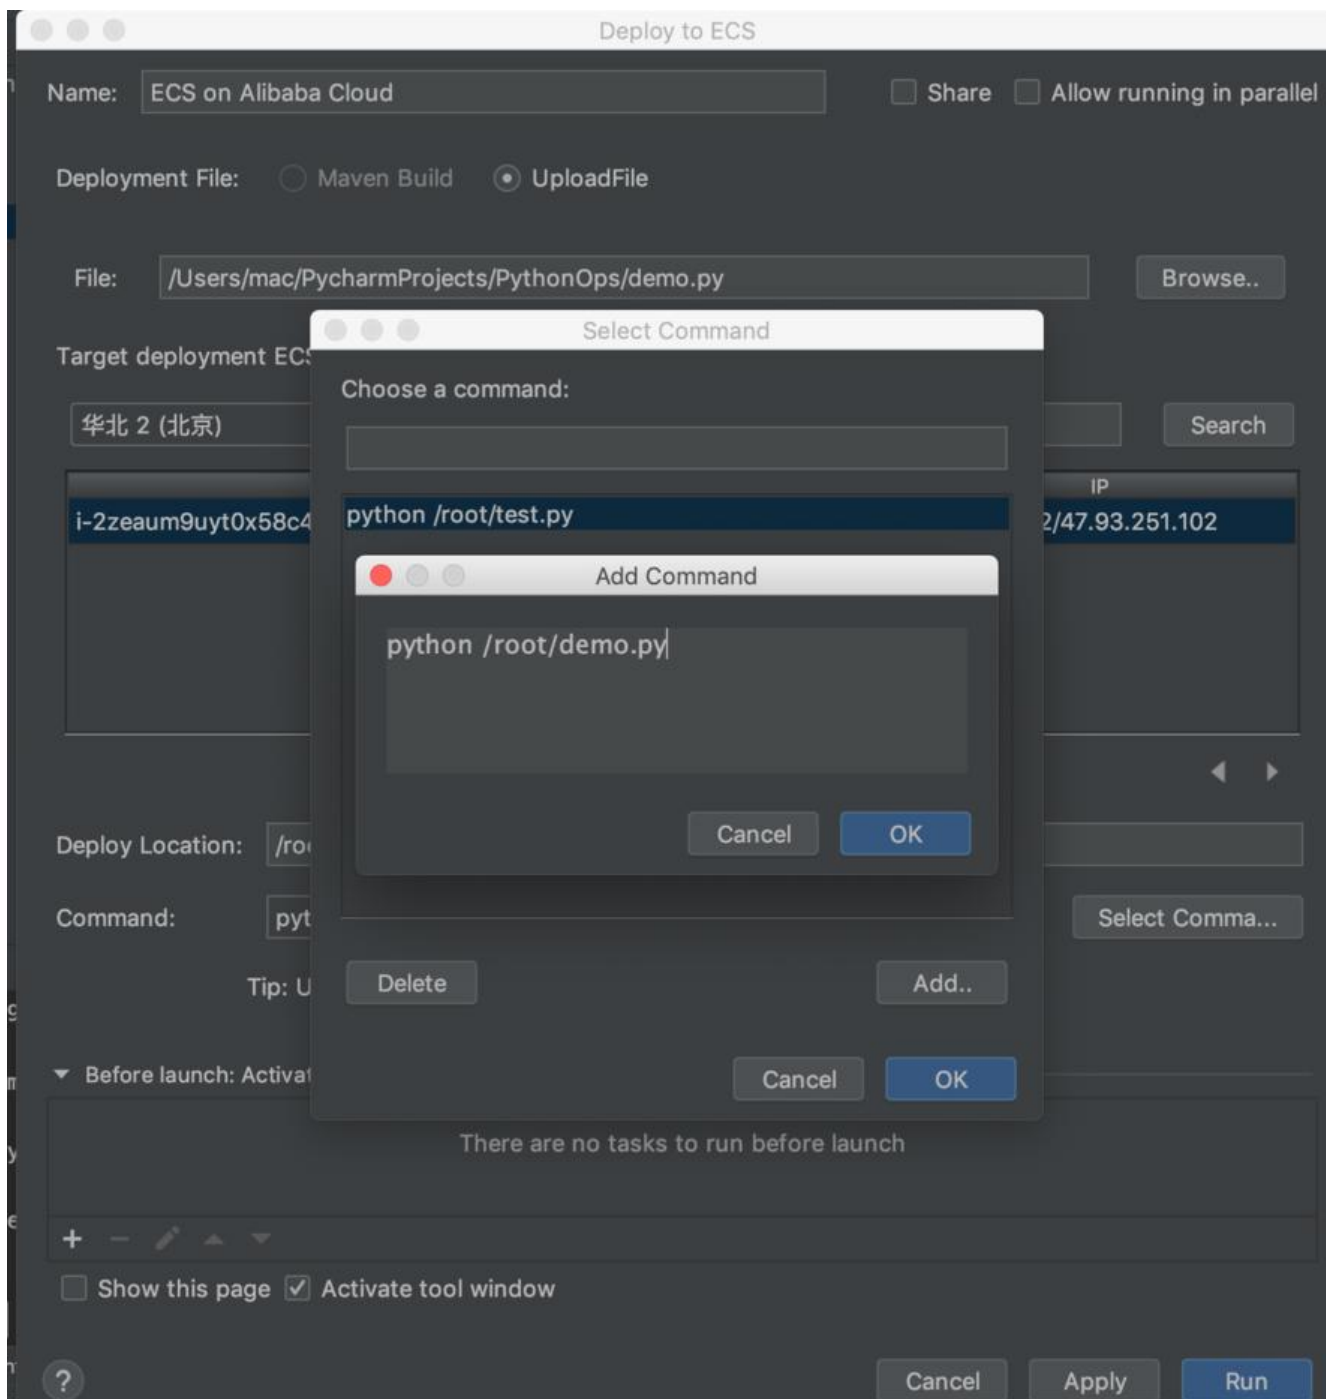

[INFO] Create Deploy Directory Success.

[INFO] Deployment File is Downloading...
[INFO] Download Deployment File from OSS Success

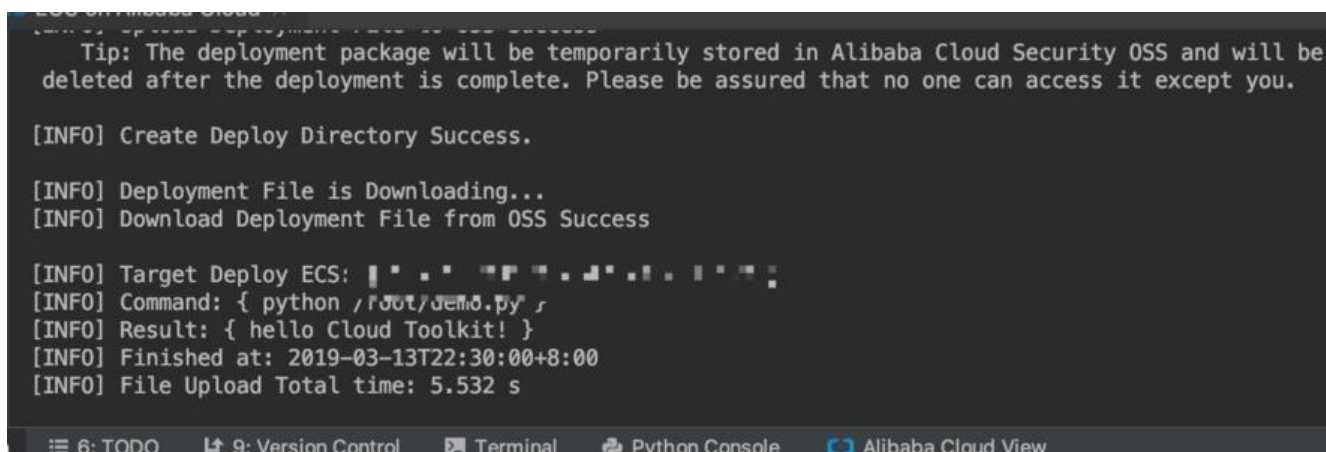

[INFO] Target Deploy Path: /root/.cloudkit/Python3.7.1/
[INFO] Command: { ls && pwd }
[INFO] Result: { test.py
/root }
[INFO] Finished at: 2019-03-13T22:23:00+8:00
[INFO] File Upload Total time: 5.305 s
```

控制台输出上面信息表示执行成功

测试部署一个单文件，并运行

点击右下角的run，可以看到我们想demo已经成功部署

感谢阿里云，这样以后基于云部署就方便很多，同时也支持文件上传等高级功能

其他编程语言类似，详细参考
