## v1.1.11 简介

The screenshot shows the Vditor editor interface. On the left, there is a code editor with the following content:

```
subgraph one
a1-->a2
end
subgraph two
b1-->b2
end
subgraph three
c1-->c2
end
...

### 时序图
...
mermaid
sequenceDiagram
Alice->>John: Hello John, how are you?
loop Every minute
John-->>Alice: Great!
end
...

### 甘特图
...
mermaid
gantt
title A Gantt Diagram
dateFormat YYYY-MM-DD
section Section
A task      :a1. 2019-01-01. 30d

```

On the right, there are three rendered diagrams:

- 流程图 (Flowchart):** A diagram with three boxes labeled 'c2', 'b2', and 'a2'. Arrows point from 'c2' to 'b2' and from 'b2' to 'a2'. The boxes are highlighted with a yellow background.
- 时序图 (Sequence Diagram):** A diagram with two lifelines, 'Alice' and 'John'. Alice sends a message 'Hello John, how are you?' to John. A loop labeled 'loop [ Every minute ]' contains a message 'Great!' from John to Alice.
- 甘特图 (Gantt Diagram):** A diagram titled 'A Gantt Diagram'. It shows a 'Section' containing two tasks: 'A task' and 'Another task'.

该版本使用 [mermaid](#) 添加了前端对甘特图、时序图、流程图的支持。

## v1.1.11 变更记录

- 31 添加 `vditor-reset class` [feature](#)
- 30 支持 `task list` [feature](#)
- 29 代码块添加复制 [feature](#)
- 28 编辑器中按下 `Ctrl+s` 会出现字符 [question](#)
- 27 支持时序图渲染和甘特图 [feature](#)
- 26 支持流程图渲染 [feature](#)
- 25 支持数学公式渲染 [feature](#)
- 24 `markdown` 不支持多行公式块 [enhancement](#)

历史版本变更请浏览[这里](#)。
