CDH修改集群IP

停止服务

```
service cloudera-scm-agent stop
service cloudera-scm-server stop
```

查看postgresql密码

```
grep password /etc/cloudera-scm-server/db.properties
```

连接postgresql

```
psql -h localhost -p 7432 -U scm
```

查看数据库中的主机IP

```
scm=> select host_id, host_identifier, name, ip_address from hosts;
 host_id | host_identifier | name | ip_address
-----+-----+-----+-----
      1 | 224916bc-1a3e-4ad5-9e65-d2831069cf01 | xxx-134 | 192.168.1.134
(1 行记录)
```

修改主机ip

```
update hosts set ip_address='10.0.0.134' where ip_address='192.168.1.134';
```

退出数据库

```
scm=> \q
```

修改所有节点的Agent配置文件

```
#将server_host对应的值修改
vi /etc/cloudera-scm-agent/config.ini
```

重启启动CDH Manager对应的管理进程及Agent服务

```
#service cloudera-scm-server-db restart
service cloudera-scm-server start
service cloudera-scm-agent start
```
