  ]
]]
FreeMarker template error:
The following has evaluated to null or missing:
==> article.articleTagObjs [in template "classic/common/list-item.ftl" at line 22, column 16]
```

Tip: It's the step after the last dot that caused this error, not those before it.

Tip: If the failing expression is known to legally refer to something that's sometimes null or missing, either specify a default value like `myOptionalVar!myDefault`, or use `<#if myOptionalVar?>when-present<#else>when-missing</#if>`. (These only cover the last step of the expression; to cover the whole expression, use parenthesis: `(myOptionalVar.foo)!myDefault`, `(myOptionalVar.foo)??`)

FTL stack trace ("~" means nesting-related):

- Failed at: `#list article.articleTagObjs as artic...` [in template "classic/common/list-item.ftl" at line 22, column 9]
- Reached through: `#include "common/list-item.ftl"` [in template "classic/macro-list.ftl" in macro "list" at line 28, column 9]
- Reached through: `@list listData=articles` [in template "classic/search-articles.ftl" at line 42 column 25]

Java stack trace (for programmers):
