下载地址

<https://www.elastic.co/cn/downloads/past-releases/filebeat-6-5-4>

配置

```
vi filebeat.yml
```

输入

```
filebeat.inputs:
```

```
- type: log
```

```
  enabled: true
```

```
  paths:
```

```
    - /var/log/*.log
```

输出到Logstash

```
output.elasticsearch:
```

```
  hosts: ["192.168.1.42:9200"]
```

或者输出到 kafka

```
#----- Kafka output -----
```

```
output.kafka:
```

```
  # Array of hosts to connect to.
```

```
  hosts: ["127.0.0.1:9092"] #hosts是string数组类型，支持多个kafka实例地址(此处不是配置zooke  
per地址)
```

```
  topic: test #kafka的topic名称
```

配置 logstash的信息

```
output.logstash:
```

```
  hosts: ["127.0.0.1:5044"]
```

启动

```
./filebeat -e -c filebeat.yml -d "publish"
```
