我的主机./bashrc 定制自己环境, and 推荐 zsh 美化 linux 界面

可以安装zsh美化界面，或者在bashrc配置自己的个性配置画面。

```
# .bashrc
```

```
# User specific aliases and functions
```

```
alias rm='rm -i'  
alias cp='cp -i'  
alias mv='mv -i'
```

```
# Source global definitions  
if [ -f /etc/bashrc ]; then  
    . /etc/bashrc  
fi
```

```
# cuijianzhe bashrc - START
```

```
alias vi='vim'  
alias grep='grep --color'  
alias dstat='dstat -cdlmnpsy'  
export PROMPT_COMMAND='{ msg=$(history 1 | { read x y; echo $y; });user=$(whoami); echo  
$(date "+%Y-%m-%d %H:%M:%S"): $user: `pwd`/: $msg ---- $(who am i); } >> /tmp/^hostname`  
`whoami`.history-timestamp'
```

```
export PS1='\[\e[1;35m\][\[\e[1;33m\]\u@\h \[\e[1;31m\]\w\[\e[1;35m\]]\[\e[1;36m\]\$ \[\e[0  
\]
```

```
# cuijianzhe bashrc - END
```

看下效果，

```
[root@blog ~]#  
[root@blog ~]# ll  
total 0  
[root@blog ~]#  
[root@blog ~]#  
[root@blog ~]# █
```

vi体现效果 定义vim

```
[root@blog ~]# vi /shell/discovertcpport.sh  
#!/bin/bash  
  
portarray=(`sudo netstat -tnlp|egrep -i "$1"|awk {'print $4'}|awk -F':' '{if ($NF~/^[0-9]*$/| print$NF)}'|sort|uniq`)  
length=${#portarray[@]}  
printf "\n"  
printf "\t""\nd"  
for ((i=0;i<length));  
do  
do  
    print  
    print  
    if [ then  
    print  
    fi  
done  
printf "\n\t"  
printf ") \n"
```

zsh界面：补全命令，显示路径信息，绝对人性化

```
# root @ zabbix in /usr/local/share/applications [15:01:18]  
$  
# root @ zabbix in /usr/local/share/applications [15:01:19]  
$  
# root @ zabbix in /usr/local/share/applications [15:01:19]  
$ █
```

据说主题配置为随机更适合下雨天哦？

```
ZSH_THEME="random"
```
