生成requirements.txt文件

```
pip freeze > requirements.txt
```

安装requirements.txt依赖

```
pip install -r requirements.txt
```

新建一个项目devops

New project

A project is where you house your files (repository), plan your work (issues), and publish your documentation (wiki), among other things.

All features are enabled for blank projects, from templates, or when importing, but you can disable them afterward in the project settings.

Information about additional Pages templates and how to install them can be found in our [Pages getting started guide](#).

Tip: You can also create a project from the command line. [Show command](#)

The screenshot shows the 'New project' form in GitLab. The 'Blank project' tab is selected. The 'Project name' field contains 'My awesome project'. The 'Project URL' field is redacted. The 'Project slug' field contains 'my-awesome-project'. There is a checkbox for 'Initialize repository with a README' which is checked. A 'Create project' button is at the bottom left, and a 'Cancel' button is at the bottom right.

本地项目命令行下执行

1. git init 生成本地./git 文件

```
git init
```

2. 添加需要上传的文件

```
git add * #需要上传的文件 文件夹
```

3. 对上传的文件进行说明

```
git commit -m "***" #双引号内对上传文件描述
```

4.关联远程仓库，添加后，远程库的名字就是 origin，这是 Git 默认的叫法，也可以改成别的，但是 origin 这个名字一看就知道是远程库。

```
git remote add origin http://192.168.1.1/projects/new.git
```

5.上传分支

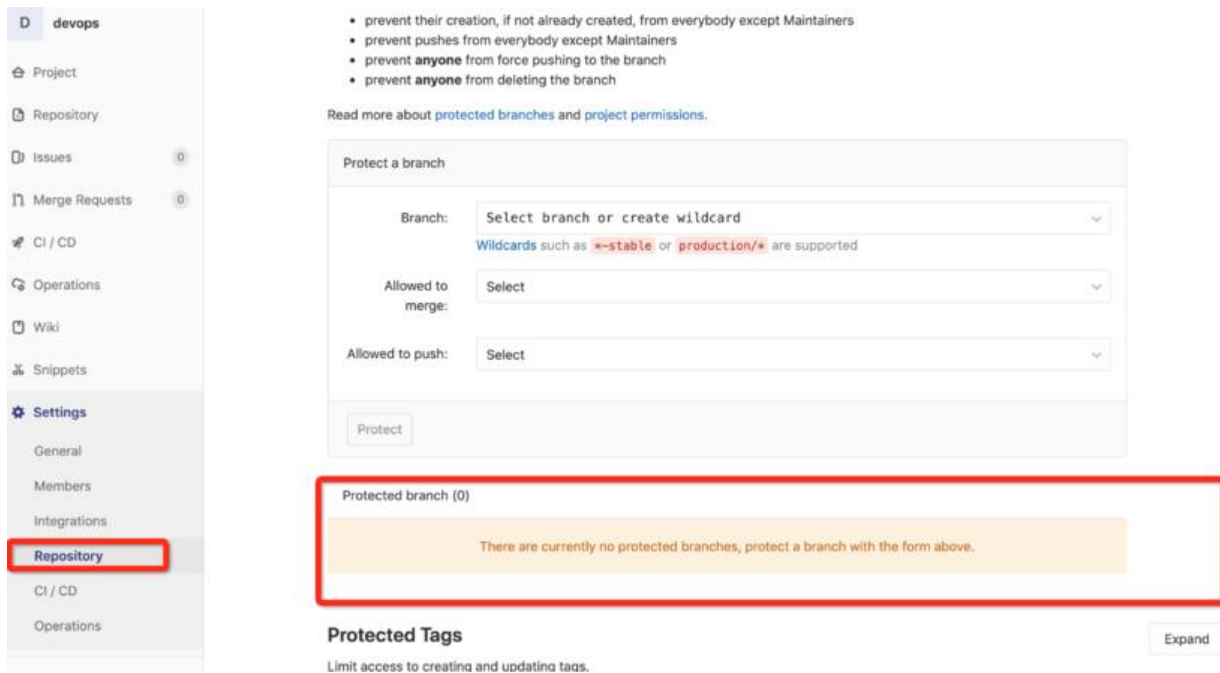

```
git push origin master
```

这边报错了

```
! [remote rejected] master -> master (pre-receive hook declined)
```

remote: GitLab: You are not allowed to force push code to a protected branch on this project.

需要解除项目master的保护模式，或者新建分支

最后提交成功

```
(django) x mac@mufengs ~/PycharmProjects/DevOps master git push origin master -f
枚举对象: 647, 完成.
对象计数中: 100% (647/647), 完成.
使用 4 个线程进行压缩
压缩对象中: 100% (637/637), 完成.
写入对象中: 100% (647/647), 3.68 MiB | 3.90 MiB/s, 完成.
总共 647 (差异 215), 复用 0 (差异 0)
remote: Resolving deltas: 100% (215/215), done.
To http://[redacted]/sunwei/devops.git
+ 06cf3fd...94d1f89 master -> master (forced update)
```

设置关注模式

git branch --set-upstream-to=origin/master master
