I have intalled Elasticsearch locally:

```
ude@mail:/usr/share/jetty9/webapps$ curl -X GET "localhost:9200/";
```

```
{  
  "name" : "mail.seenami.com",  
  "cluster_name" : "elasticsearch",  
  "cluster_uuid" : "ZCnibabUQ0eW8aYgACU38A",  
  "version" : {  
    "number" : "7.3.0",  
    "build_flavor" : "default",  
    "build_type" : "deb",  
    "build_hash" : "de777fa",  
    "build_date" : "2019-07-24T18:30:11.767338Z",  
    "build_snapshot" : false,  
    "lucene_version" : "8.1.0",  
    "minimum_wire_compatibility_version" : "6.8.0",  
    "minimum_index_compatibility_version" : "6.0.0-beta1"  
  },  
  "tagline" : "You Know, for Search"  
}
```

Configured symphony.property for it:

## Elasticsearch

```
es.enabled=true
```

```
es.server=http://localhost:9200
```

searching ended up failure:

<https://www.wikicensored.com/search?key=seenami>

## 404 Not Found!

What I am missing? please.
