买的云服务器，部署了solo，准备写博客的，昨天晚上突然访问不了。去数据库一看，表被删了，还我数据库里创建了一个数据库，有一个警告的表竟然还留下了比特币的账号还有勒索邮箱。昨天晚上装好数据库，还没来得及设置修改权限就被黑了。

To recover your lost Database send 0.03 Bitcoin (BTC) to our Bitcoin address 17WATrvTKmrER7XJocmWRGF5rpViMDXhU and contact us by Email with your Server IP or Domain name and a Proof of Payment. Your Database is downloaded and backed up on our servers. Backups that we have right now: solo. Any email without your server IP Address or Domain Name and a Proof of Payment together will be ignored. If we don't receive your payment in the next 10 Days, we will delete your backup.

如果大家买云服务器准备写博客，一定要设置好数据库密码，最好不要开通数据库外网访问的权限，定期做好数据备份。

大佬有没有什么好的建议对于这种黑客入侵啊？
