- 1.项目地址:<https://github.com/myheroacademia> (angular写的, github.io是打包的静态页面)
- 2.数据采用mock
- 3.图片有点大, 访问很慢,<https://myheroacademia.github.io/#/herolist/myheroacademia>
- 4.数据格式设置好了, 鹿json就行了

```
export interface Skill {  
    img: string;  
    name: string;  
    desc: string;  
}  
  
export interface Event {  
    img: string;  
    time: string;  
    location: string;  
    desc: string;  
}  
  
export interface Hero {  
    id: number;  
    name: string;  
    img: string;  
    desc: string;  
    height: string;  
    bir: string;  
    blood: string;  
    food: string;  
    events: Array<Event>;  
    skills: Array<Skill>;  
}  
  
export interface Footer {  
    title?: string;  
    link?: string;  
    children?: Array<Footer>;  
}  
  
export interface Herolist {  
    key: string;  
    carousels: Array<string>;  
    flows: Array<{ img: string, desc: string, time: string, up: number, down: number, name: string }>;  
    desc: string;  
    heros: Array<Hero>;  
    footer: Array<Footer>;  
}
```

目前设置了 我的英雄学院 和 玩皮斯

6.加组织的留邮箱，包括 <https://github.com/eiyouhe>

7.创建组织是为啥：因为可以弄自己喜欢的图标，还好玩。...嗯，好玩。

页面还在BUILDING!!!!
