docker部署solo后未发现错误日志, ping 域名能ping通, 但网页访问不了

```
[root@Long ~]# docker logs solo
[INFO ]-[2019-11-15 09:25:06]-[org.b3log.solo.Server:215]: Solo is booting [ver=3.6.7, os=Linux, isDocker=true, luteAvailable=false, pid=1, runtimeDatabase=MYSQL, runtimeMode=PRODUCTI
jdbc.username=root, jdbc.URL=jdbc:mysql://127.0.0.1:3306/solo?useUnicode=yes&characterEncoding=UTF-8&useSSL=false&serverTimezone=UTC]
[WARN ]-[2019-11-15 09:25:07]-[org.b3log.solo.service.InitService:161]: Solo has not been initialized, please open your browser to init Solo
```

用命令docker ps 发现8080端口未被映射, 各位大佬这个是什么原因造成的呢?

```
[root@Long ~]# docker ps
CONTAINER ID        IMAGE               COMMAND                  CREATED            STATUS              PORTS
6c4a71fda9cb       b3log/solo         "java -cp lib/*:.or_"   About a minute ago Up About a minute
4e6d917d8a79       mysql:5.7          "docker-entrypoint.s..." 17 hours ago      Up 17 hours        0.0.0.0:3306->3306/tcp, 33060/tcp
mysql
```

执行命令

```
docker run --detach --name solo --network=host \
--env RUNTIME_DB="MYSQL" \
--env JDBC_USERNAME="root" \
--env JDBC_PASSWORD="FDsa147258" \
--env JDBC_DRIVER="com.mysql.cj.jdbc.Driver" \
--env JDBC_URL="jdbc:mysql://127.0.0.1:3306/solo?useUnicode=yes&characterEncoding=UTF-8&useSSL=false&serverTimezone=UTC" \
--rm \
b3log/solo --listen_port=8080 --server_scheme=http --server_host=www.orangexxxx.cn
```
