```
//检测客户端: 微信(micromessenger)
public boolean checkClient(HttpServletRequest request, HttpServletResponse response, Object handler){
    String userAgent = request.getHeader("user-agent").toLowerCase();
    if(userAgent.indexOf("micromessenger")>-1){//微信客户端
        return true;
    }else{
        return false;
    }
}

//检测客户端: 企业微信(micromessenger,wxwork)
public boolean checkClient(HttpServletRequest request, HttpServletResponse response, Object handler){
    String userAgent = request.getHeader("user-agent").toLowerCase();
    if(userAgent.indexOf("micromessenger")>-1 && userAgent.indexOf("wxwork")>-1){//企业微信客户端
        return true;
    }else{
        return false;
    }
}
```
