一件有意思的事情就是本来想要做 v2ray+vemss+tls+caddy+cloudflare 的，变成了使用 cloudflare 对博客进行加速。

<https://dash.cloudflare.com/>

接入 cloudflare 的方法，本文不做说明，可以自行百度

The screenshot shows the Cloudflare dashboard for the domain mufengs.com. The top navigation bar includes links for Overview, Analytics, DNS, SSL/TLS, Firewall, Access, Speed, Caching, Workers, Page Rules, Network, Traffic, Stream, Custom P..., Apps, and Scrape Sh... The main section is titled "DNS management for mufengs.com" and contains a table of DNS records. Below the table, there is a section for "Cloudflare nameservers" with instructions on how to use them.

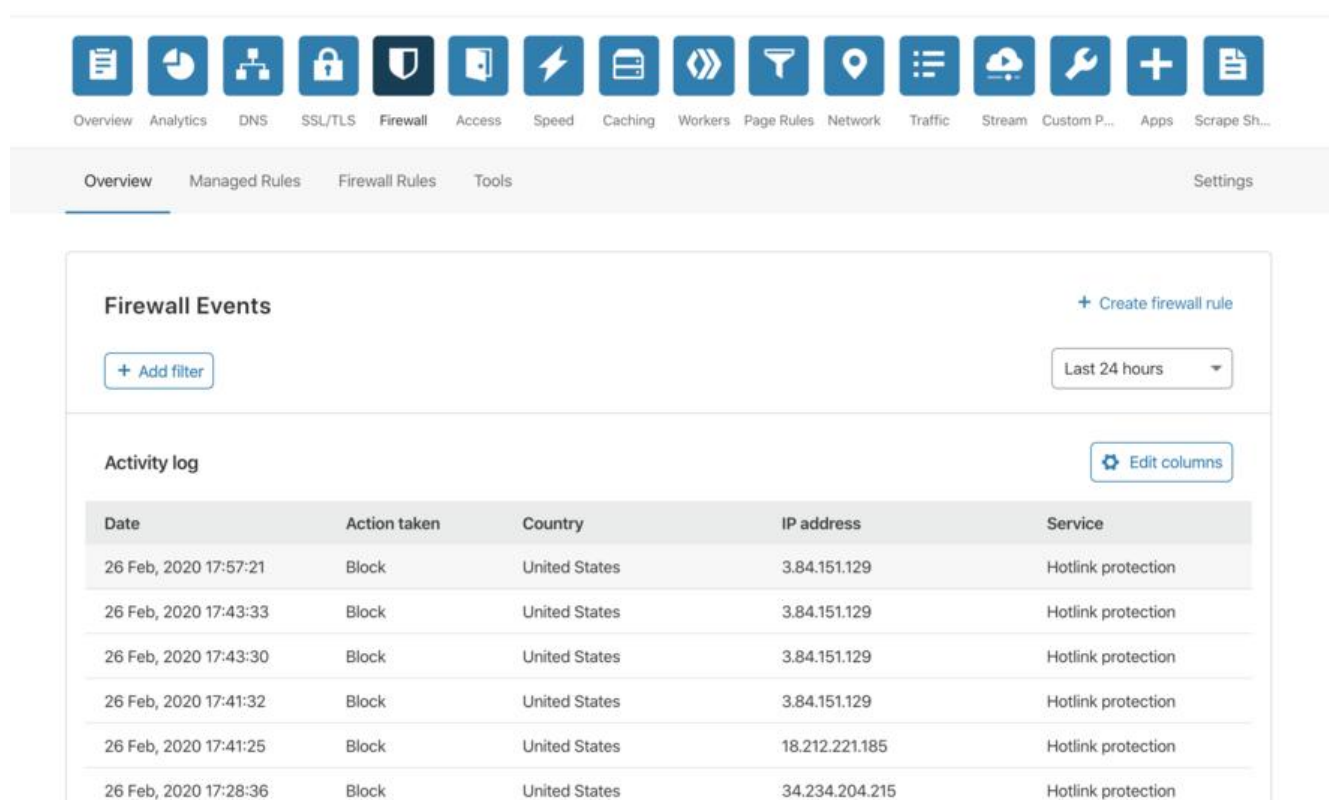

Type	Name	Content	TTL	Proxy status
A	blog		Auto	Proxied
A	mufengs.com		Auto	Proxied
A	www		Auto	Proxied
MX	mufengs.com	mxbiz1.qq.com	5	DNS only
MX	mufengs.com	mxbiz2.qq.com	10	DNS only

Cloudflare nameservers

To use Cloudflare, ensure your authoritative DNS servers, or nameservers have been changed. These are your assigned Cloudflare nameservers.

cloudflare 托管了域名解析，唯一不好的就是不能配置通配符，因为通配符是需要收费的，也能理解毕竟很多 ssl 提供商比如赛门铁克，免费的 ssl 也是不支持通配符的

可以配置防火墙规则

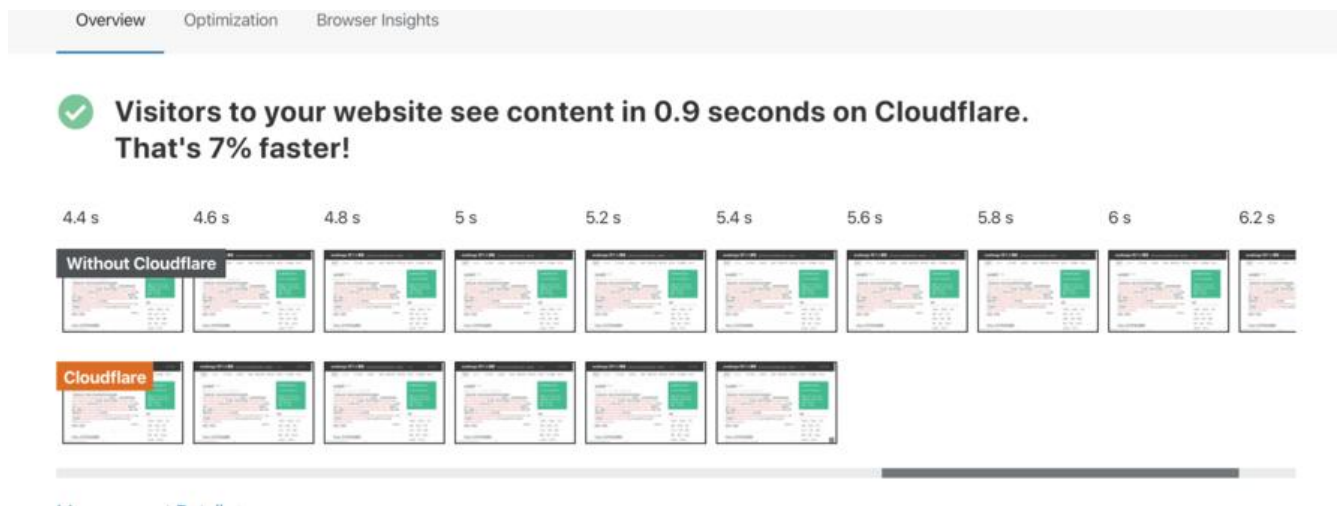

The screenshot shows the Cloudflare dashboard for the domain mufengs.com, specifically the "Firewall Events" section. The top navigation bar includes links for Overview, Analytics, DNS, SSL/TLS, Firewall, Access, Speed, Caching, Workers, Page Rules, Network, Traffic, Stream, Custom P..., Apps, and Scrape Sh... The main section is titled "Firewall Events" and contains a table of activity log entries. The table has columns for Date, Action taken, Country, IP address, and Service. The entries show several "Block" actions taken by Cloudflare on various IP addresses, all related to "Hotlink protection".

Date	Action taken	Country	IP address	Service
26 Feb, 2020 17:57:21	Block	United States	3.84.151.129	Hotlink protection
26 Feb, 2020 17:43:33	Block	United States	3.84.151.129	Hotlink protection
26 Feb, 2020 17:43:30	Block	United States	3.84.151.129	Hotlink protection
26 Feb, 2020 17:41:32	Block	United States	3.84.151.129	Hotlink protection
26 Feb, 2020 17:41:25	Block	United States	18.212.221.185	Hotlink protection
26 Feb, 2020 17:28:36	Block	United States	34.234.204.215	Hotlink protection

可以查看加速效果

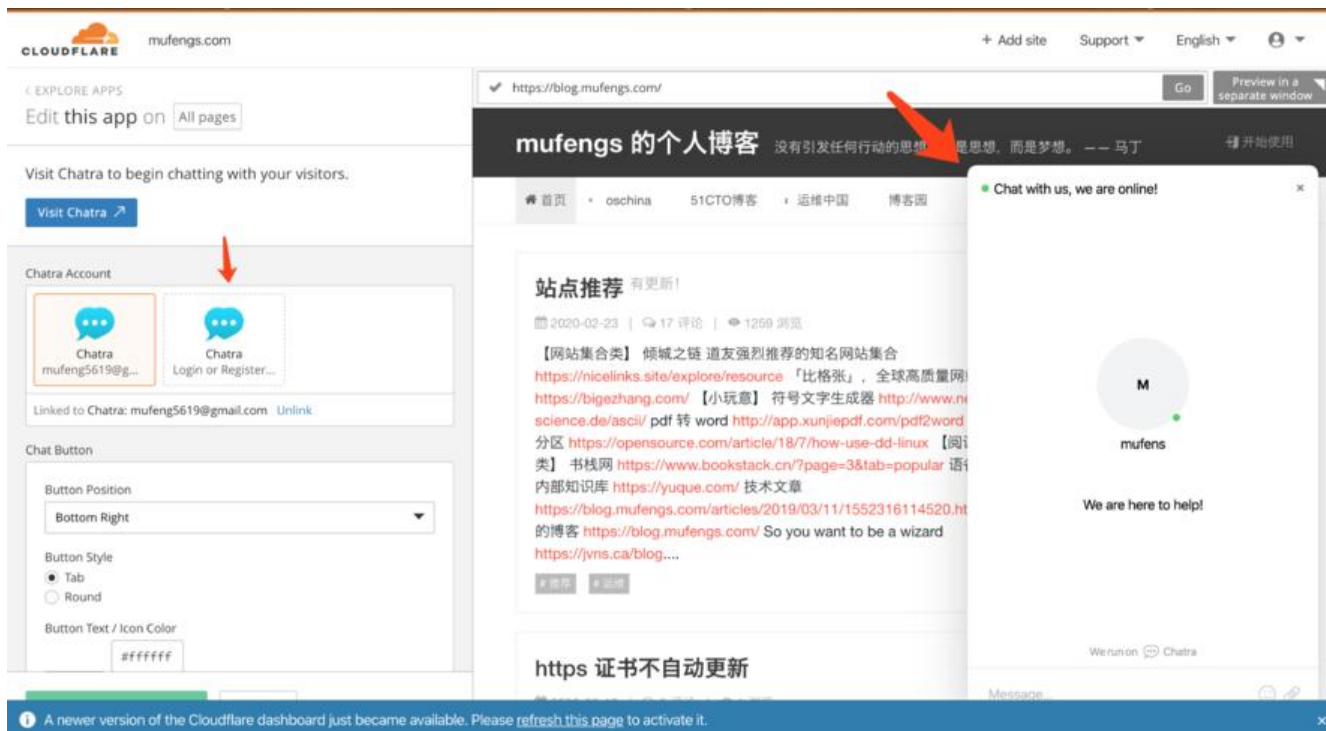

可以实现强制 https full strict，所有的域名会每到服务器之前就跳转到 https，我这边使用的是 https 的

这边主要讲下 chatra 的使用

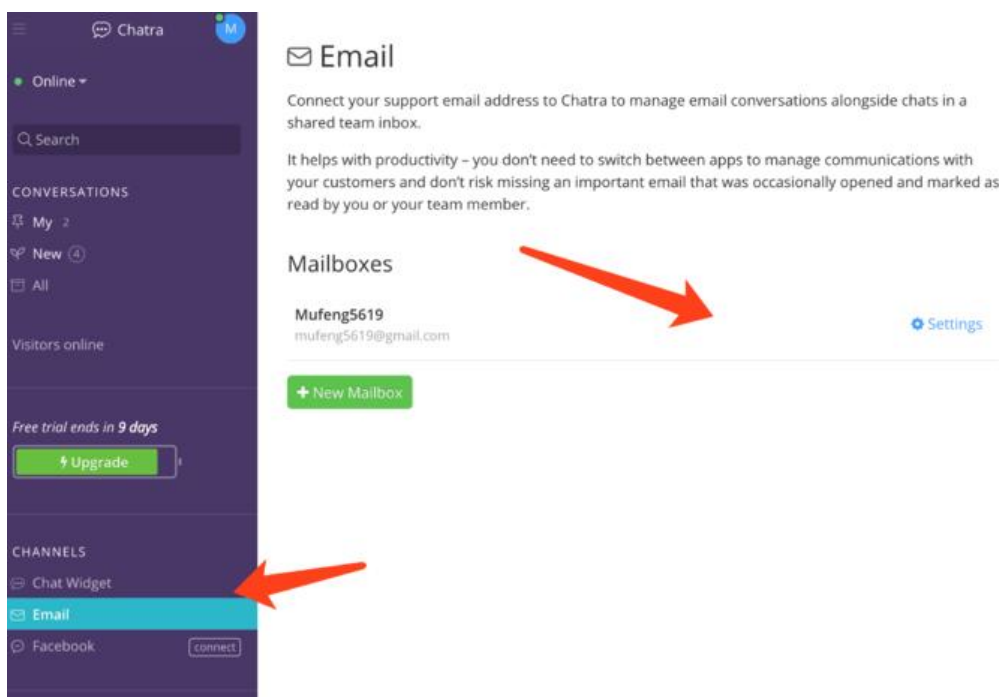

首先我们点击导航上的 apps，搜索 chatra

点击预览效果，这边需要先注册一个 chatra 的帐号，注册完成之后点击 install

到这里没有结束，我们进入 chatra 的 Web 页面，配置邮箱

根据提示进行配置，添加 gmail 的转发规则，我这边使用的是 gmail

之后的效果是，在网站上有个聊天的浮窗，可以通过邮件转发来实现，实时聊天，效果不错的

https 证书不自动更新

2020-02-18 | 0 评论 | 2 浏览

之前用的容器自动更新 https 证书, 这两天陆陆续续收到证书到期的邮件 进入服务器, 查看日志, 出现如下 "Could not get nonce, let's try again 查看相关文章, 得出是 acme.sh 的版本太久的原因导致的 docker exec acme /bin/bash cd /acme.sh ./acme.sh --upgrade --auto-upgrade 刷新页面发现证书更新成功

HTTPS
