参考官方链接:<https://mp.baomidou.com/guide/faq.html#mybatisplusexception-your-property-named-xxx-cannot-find-the-corresponding-database-column-name>

尝试了几种方式未成功，最终选择换掉druid数据源:

spring:

```
# 数据源配置
datasource:
  username: root
  password: 12345678
  type: com.zaxxer.hikari.HikariDataSource
  url: jdbc:mysql://127.0.0.1:3306/ofbiz?serverTimezone=GMT%2B8&useUnicode=true&characterEncoding=utf8
  #mysql8版本以上驱动包指定新的驱动类
  driver-class-name: com.mysql.cj.jdbc.Driver
```

<!-- 自动引用了spring-boot-starter-jdbc, 所以无需单独导入 -->

```
<dependency>
  <groupId>com.baomidou</groupId>
  <artifactId>mybatis-plus-boot-starter</artifactId>
  <version>3.2.0</version>
</dependency>
```
