环境：mac os, 最新的symphony代码 , ES版本为Version: 7.8.0

操作：在web界面尝试搜索

现象：404错误， debug代码，发现ES返回的response提示错误

请求

```
{ "highlight": { "number_of_fragments": 3, "fields": { "articleContent": {} }, "fragment_size": 150 }, "size": 0, "query": { "and": { "filter": [ { "term": { "articleStatus": 0 } } ], "query": [ { "or": [ { "match": { "articleContent": "测试" } }, { "match": { "articleTitle": "测试" } } ] } ] } }, "from": 1, "sort": [ { "articleCreateTime": "desc" }, { "_score" }
```

响应

```
{ "error": { "root_cause": [ { "type": "parsing_exception", "reason": "unknown query [and]", "line": 1, "column": 116 } ], "type": "parsing_exception", "reason": "unknown query [and]", "line": 1, "column": 116, "caused_by": { "type": "named_object_not_found_exception", "reason": "[1:116] unknown field [and]", "status": 400 } }
```

问题：没用过ES，是不是symphony跟ES7.8不兼容啊
