vhost配置文件的作用

作用：vhost配置文件的作用是为了将多个server配置文件的信息，单独存放，不过于集中在nginx.conf配置中，这样有助于故障排除，如配置查看

通过访问服务端nginx代理的域名可将流量转发至配置的客户机，客户机将服务端转发过来的流量转至本机的监听相应端口的服务。

nginx代理服务端：

```
#网易云音乐API虚拟主机块配置
server{
    listen 80;
    server_name music163.cjzshilong.cn;
    location / {
        proxy_pass http://127.0.0.1:3001;
    }
}

# HTTPS server

server {
    listen      443 ssl;
    server_name music163.cjzshilong.cn;

    ssl_certificate      /usr/local/nginx/conf/ssl/1_163.cjzshilong.cn_bundle.crt;
    ssl_certificate_key  /usr/local/nginx/conf/ssl/2_163.cjzshilong.cn.key;

    ssl_session_cache    shared:SSL:1m;
    ssl_session_timeout  5m;

    ssl_ciphers ECDHE-RSA-AES128-GCM-SHA256:HIGH:!aNULL:!MD5:!RC4:!DHE;
    ssl_prefer_server_ciphers on;

    location /{
        proxy_set_header Host $host;
        proxy_set_header Connection "Keep-Alive";
        proxy_set_header X-Real-IP $remote_addr;
        proxy_set_header X-Forwarded-For $proxy_add_x_forwarded_for;
        proxy_buffer_size 128k;
        proxy_buffers 32 32k;
        proxy_busy_buffers_size 128k;
        proxy_pass  http://127.0.0.1:3001;
    }
}
```

- `try_files` 将尝试你列出的文件并设置内部文件指向, `try_files`方法让Nginx尝试访问后面得\$uri链接并进根据@confluence配置进行内部重定向。当然`try_files`也可以以错误代码赋值，如`try_files /index php = 404 @confluence`，则表示当尝试访问得文件返回404时，根据@confluence配置项进行重向。

nginx配置：

```
[root@vpc /usr/local/nginx/conf]# cat nginx.conf
user www www;

error_log /var/log/nginx/error.log error;
pid    /var/run/nginx.pid;
lock_file /var/lock/nginx;

worker_rlimit_nofile 102400;
worker_processes auto;

events {
    worker_connections 10240;
    use epoll;
    multi_accept on;
    accept_mutex off;
}

http {
#core
    include      mime.types;
    default_type application/octet-stream;
    connection_pool_size    1024;
    client_body_buffer_size 16k;
    client_body_temp_path   /usr/local/nginx/var/tmp/client_body 1 2;
    client_body_timeout     30;
    client_header_buffer_size 4k;
    large_client_header_buffers 4 4k;
    client_header_timeout   30;
    client_max_body_size   32m;
    #keepalive_disable msie6 safari;
    keepalive_timeout        3;
    tcp_nodelay    on;
    send_timeout   30;
    sendfile      on;
    tcp_nopush    off;
    server_names_hash_max_size  512;
    server_names_hash_bucket_size 128;
    server_tokens off;
    open_file_cache off;
#index
    index  index.php index.html index.htm;
#fastcgi
    fastcgi_connect_timeout  60;
    fastcgi_read_timeout    60;
    fastcgi_send_timeout    60;
