代码是在今年三月份写的，当时捣鼓了一天，现在也有点忘了，就直接把代码贴出来吧，今天测试了一下还是可以用的

代码中有一些包还有方法是自己的，就不都粘贴出来了，如果直接复制代码的，会有报错，需要再手动改改

```
<!--相关依赖-->
<dependency>
    <groupId>org.jsoup</groupId>
    <artifactId>jsoup</artifactId>
    <version>1.11.3</version>
</dependency>
<dependency>
    <groupId>cn.hutool</groupId>
    <artifactId>hutool-all</artifactId>
    <version>5.1.0</version>
</dependency>
```

```
package com.Yang.watermark;

import java.net.URLDecoder;
import java.net.URLEncoder;
import java.time.LocalDate;
import java.util.HashMap;
import java.util.Map;

import org.jsoup.Jsoup;
import org.jsoup.nodes.Document;
```

```
import com.alibaba.fastjson.JSONArray;
import com.alibaba.fastjson.JSONObject;

import lombok.extern.slf4j.Slf4j;

@Slf4j
public class TencentVideo{

    String url = "";
    String appVersion = "1.0.143";

}

HttpResponse requestNoHeader(String url) {
    return HttpUtil.createGet(url).execute();
}
}

```

上边的代码中预留了一个调用node服务的地方，这个是一堆加密的玩意儿，需一个node服务，还有一个wasm文件

[点击此处下载node服务的js代码以及wasm文件](#)

下载好之后直接按照node命令启动服务即可

启动之后把node服务的ip和端口填写在Java代码中 (49行左右)

接下来就可以运行Java脚本执行获取结果了，最后获取到的是m3u8的地址

里边有一些参数是固定的值(unid)(guid)之类的，不要去修改它，代码呢，可能写的比较low，哈哈哈
