docker命令:

蒲公英官网提供如下命令:

1. 拉取镜像

docker pull bestoray/pgyvpn

2. 启动容器

docker run -d --net host --cap-add NET_ADMIN --env PGY_USERNAME="xxx" --env PGY_PA SWORD="xxx" bestoray/pgyvpn

- 1. 必须加字段 --cap-add NET_ADMIN , 否则虚拟网卡会创建失败, 导致组网无法正常通信
- 2. USERNAME 选项支持输入 Oray官网帐号 或 UID
- 3. -v 可以使用容器的卷功能
- 4. 镜像中已默认安装ping, ifconfig等网络调试工具, 方便用户使用
- 5. 日志路径: /var/log/oray
- 6. 配置路径: /etc/oray/pgyvpn

管理页面操作:

1. 打开ContainerStation, Images里点击Pull

Containe	r Station											- + ×
	Container Station								7	0) ¢	s. :

4. 选择高级设置,添加用户名密码和将网络设置为Host

(i) 🗘

ainerSta	ition		(10 ⁷) 3
w	Create Container	×		
	Image : 8wepi89x.mirror.aliyuncs.com/bestoray/pgyvpn Name : pgyvpn-2 Command: -cap-add NET_ADMIN Entrypoint :		A P	
nces : :	Memory Limit : 7862 to MB The CPU limit must be within 10-100 %. The memory limit must be within 64-7862MB. Advanced Settings >> Create Cancel	8	* * * * *	
w	Container Settings		F Stop	···
nces	Advanced Settings >> Environm Network Device Shared F PGY_USERNAME		10.7 ке	3/5
ers	Please restart the container to apply these settings Apply Cancel			

Environm	Container Hostname :	pgyvpn-1
	Container MAC Address	1. let
Network	Network Mode :	Host
Device		The port may conflict with the NAS port when selecting Host mode.
		Use local host network (command: -net=host)
Shared F		Note: This option allows containers to have full access to the host network interface.

5. 小等一下,登录成功日志出现如下内容便完活。返回电脑蒲公英客户端就能 到。
