各位朋友大家好，最近开始使用思源笔记，非常喜欢思源笔记的各种功能。

最近想设置笔记中的章节进行自动编号，查了一些资料，发现修改CSS文件就可以实现。

尝试之后发现在正文和Table of Content中都可以正确显示编号，但是在左侧的大纲视图中没法正确行编号。最终发现问题是左侧大纲视图的HTML格式并不是标准的嵌套格式，所以无法正确进行章节自动嵌套编号。

如何才能向开发者反馈这个问题呢？

实现章节自动嵌套编号的效果和CSS代码分别如下：

```
/*正文编号*/  
.vditor-ir {  
  counter-reset: h1  
}  
  
h1 {  
  counter-reset: h2  
}  
  
h2 {  
  counter-reset: h3  
}
```

```

h3 {
  counter-reset: h4
}

h4 {
  counter-reset: h5
}

h5 {
  counter-reset: h6
}

.vditor-ir h1:before {
  counter-increment: h1;
  content: counter(h1) " "
}
.vditor-ir h2:before {
  counter-increment: h2;
  content: counter(h1) "." counter(h2) " "
}
.vditor-ir h3:before{
  counter-increment: h3;
  content: counter(h1) "." counter(h2) "." counter(h3) " "
}
.vditor-ir h4:before{
  counter-increment: h4;
  content: counter(h1) "." counter(h2) "." counter(h3) "." counter(h4) " "
}
.vditor-ir h5:before {
  counter-increment: h5;
  content: counter(h1) "." counter(h2) "." counter(h3) "." counter(h4) "." counter(h5) " "
}
.vditor-ir h6:before {
  counter-increment: h6;
  content: counter(h1) "." counter(h2) "." counter(h3) "." counter(h4) "." counter(h5) "." counter(
6) " "
}

/*TOC编号*/
.vditor-toc ul {
  counter-reset: counter;
}
.vditor-toc li::before {
  counter-increment: counter;
  content: counters(counter, '.') ' ';
}
/*左侧大纲编号*/
.vditor-reset.fn__flex-1 ul {
  counter-reset: counter;
}
.vditor-reset.fn__flex-1 li::before {
  counter-increment: counter;
}

```

```
content: counters(counter, '.') ' ' ;  
}
```
